**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**(UNAUDITED)**

**Note 1. Basis of Presentation and Accounting Policies**

***Basis of Presentation***

Zenith National Insurance Corp. (“Zenith National”) is a Delaware holding company, which is a wholly-owned indirect subsidiary of Fairfax Financial Holdings Limited (“Fairfax”). Fairfax is a Canadian financial services holding company, whose common stock is publicly traded on the Toronto Stock Exchange, and is principally engaged in property and casualty insurance, reinsurance and associated investment management. Zenith National’s wholly-owned subsidiaries (primarily Zenith Insurance Company (“Zenith Insurance”)), specialize in the workers’ compensation insurance business, nationally and, since 2010, in the property-casualty business for California agriculture. Unless otherwise indicated, all references to the “Company” refer to Zenith National together with its subsidiaries.

The accompanying unaudited Consolidated Financial Statements of the Company have been prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”) for interim financial information. Accordingly, they do not include all of the information and notes required by GAAP for complete financial statements. In the opinion of management, all adjustments (including normal, recurring adjustments) necessary for a fair presentation of the Company’s financial position and results of operations for the periods presented have been included. The results of operations for an interim period are not necessarily indicative of the results for an entire year. For further information, refer to the Audited Consolidated Financial Statements and Notes thereto of the Company for the year ended December 31, 2018.

The accompanying Consolidated Financial Statements differ from the financial information published by Fairfax in regards to the Company primarily due to differences between GAAP and International Financial Reporting Standards (“IFRS,” the reporting basis used by Fairfax), intercompany investment transactions and accounting adjustments recorded by Fairfax related to the acquisition of the Company.

***Adopted Accounting Standards***

Below is information regarding accounting standards that the Company adopted during the periods for which the Financial Statements have been presented.

***Leases***

Effective January 1, 2019, the Company adopted the updated guidance for leases and elected to utilize an option to record a cumulative-effect adjustment to the opening balance of retained earnings for the year of adoption. Accordingly, the Company’s reporting for the comparative period prior to adoption continue to be presented in the financial statements in accordance with previous lease accounting guidance. The adoption of the updated guidance resulted in the Company recognizing a right-of-use asset of \$25.6 million and a lease liability of \$27.1 million in the Consolidated Balance Sheet, as well as de-recognizing the liability for deferred rent that was required under the previous guidance, for its office lease agreements as of January 1, 2019. The cumulative effect adjustment to the opening balance of retained earnings was zero. The adoption of the updated guidance did not have a material effect on the Company’s results of operations or cash flows (see Note 11).

***Recognition and Measurement of Financial Assets and Financial Liabilities***

Effective January 1, 2019, the Company adopted the updated guidance for the recognition, measurement, presentation and disclosure of certain financial instruments. The updated guidance requires equity investments, except those accounted for under the equity method of accounting, that have readily

**ZENITH NATIONAL INSURANCE CORP. AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**(UNAUDITED)**

determinable fair value to be measured at fair value with any changes in fair value recognized in net income. Equity securities that do not have readily determinable fair values may be measured at estimated fair value or cost less impairment, if any, adjusted for subsequent observable price changes, with changes in the carrying value recognized in net income. A qualitative assessment for impairment is required for equity investments without readily determinable fair values. The updated guidance also eliminates the requirement to disclose the method and significant assumptions used to estimate the fair value of financial instruments measured at amortized cost on the balance sheet. Upon adoption of this guidance on January 1, 2019, \$4.2 million of pre-tax net unrealized losses on equity investments previously classified as available-for-sale and \$0.3 million of pre-tax net unrealized gains on cost-method partnership investments were reclassified from accumulated other comprehensive loss ("AOCL") to retained earnings. The change in accounting for equity securities and cost-method partnership investments did not affect the Company's total shareholders' equity and the after-tax net unrealized losses of \$3.1 million reclassified to retained earnings will never be recognized in net income.

*Cash flows classifications*

Effective January 1, 2019, the Company adopted the updated guidance on the classification of cash flows related to certain activities in the statement of cash flows to reduce diversity in practice. Under the new guidance, distributions received on equity method investments that are considered to be a return on investment are reported as cash flows from operating activities. These distributions were previously reported as cash flows from investing activities. The adoption of this guidance did not have a material impact on the Company's Statement of Cash Flows.

*Reclassification of the stranded tax effects related to The Tax Cuts and Jobs Act of 2017 ("Act")*

In February 2018, the Financial Accounting Standards Board ("FASB") issued updated guidance that allows a reclassification from AOCL to retained earnings for the stranded tax effects resulting from the enactment of the Act. The Company early adopted this amended guidance on January 1, 2018, and as a result, elected to reclassify a total of \$0.8 million in stranded tax effects from AOCL to retained earnings as of January 1, 2018.

***Recent Accounting Standards Not Yet Adopted***

*Revenue Recognition*

In May 2014, the FASB issued new guidance on how an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. This guidance does not apply to contracts within the scope of other standards (for example, insurance contracts or lease contracts). In August 2015, the FASB deferred the effective date of this new guidance by one year. This guidance is now effective for annual reporting periods beginning after December 15, 2018 and interim periods thereafter. Early adoption is not permitted. The guidance is not expected to have a material impact on the Company's consolidated financial position, results of operations or cash flows.

*Measurement of Credit Losses on Financial Instruments*

In June 2016, the FASB issued new guidance which requires a financial asset (or a group of financial assets) measured at amortized cost to be presented at the net amount expected to be collected. The allowance for credit losses is a valuation account that is deducted from the amortized cost basis of the financial asset(s) to present the net carrying value of the amount expected to be collected on the financial asset. The guidance broadens the information that an entity must consider in developing its expected credit loss estimate for assets measured either collectively or individually; measurement of expected credit losses will be based on relevant information about past events, including historical experience, current conditions, and reasonable

**ZENITH NATIONAL INSURANCE CORP. AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**(UNAUDITED)**

and supportable forecasts that affect the collectability of the reported amount. Furthermore, the new guidance requires credit losses relating to available-for-sale securities to be recorded through an allowance for credit losses, and an entity will be able to record reversals of credit losses in current period net income. The guidance is effective for annual periods beginning after December 15, 2020 and interim periods thereafter. All entities may adopt this guidance as early as periods beginning after December 15, 2018. The guidance is not expected to have a material impact on the Company's consolidated financial position, results of operations or cash flows.

*Goodwill Impairment*

In January 2017, the FASB issued new guidance to simplify how an entity is required to test goodwill for impairment by eliminating Step 2 from the goodwill impairment test. Step 2 measures a goodwill impairment loss by comparing the implied fair value of a reporting unit's goodwill with the carrying amount of that goodwill. Under the new guidance, entities will record an impairment charge based on the excess of a reporting unit's carrying amount over its fair value. The guidance will be effective for annual periods or any interim goodwill impairment tests beginning after December 15, 2021. Early adoption is permitted. The guidance is not expected to have a material impact on the Company's consolidated financial position, results of operations or cash flows.

*Callable Debt Securities – Accounting for Premium Amortization*

In March 2017, the FASB issued updated guidance to shorten the amortization period for certain callable debt securities held at a premium. The guidance requires the premium to be amortized to the earliest call date, however, securities held at a discount will continue to be amortized to maturity. The guidance will be effective for annual periods beginning after December 15, 2019, and interim periods thereafter. Early adoption is permitted. This guidance is not expected to have a material impact on the Company's consolidated financial position, results of operations or cash flows.

*Accounting for Cloud Computing Implementation Costs*

In August 2018, the FASB issued updated guidance to reduce complexity for the accounting for costs of implementing a cloud computing service arrangement. The new guidance aligns the requirements for capitalizing implementation costs incurred in a hosting arrangement that is a service contract with the requirements for capitalizing implementation costs incurred to develop or obtain internal-use software. The updated guidance is effective for reporting periods beginning after December 15, 2020. Early adoption is permitted. The guidance is not expected to have a material impact on the Company's consolidated financial position, results of operations or cash flows.

*Accounting for Variable Interest Entities*

In October 2018, the FASB issued new guidance that expands the application of a specific private company accounting alternative related to variable interest entities and changes how entities evaluate decision-making fees under the variable interest guidance. Entities will consider indirect interests held through related parties under common control on a proportionate basis rather than in their entirety. Entities are required to apply the amendments retrospectively. The guidance will be effective for reporting periods beginning after December 15, 2020 and interim periods thereafter. Early adoption is permitted. The guidance is not expected to have a material impact on the Company's consolidated financial position, results of operations or cash flows.

- (a) Investments in common stock, partnerships and limited liability companies accounted under the equity method are recorded at cost, adjusted for subsequent purchases, distributions, other-than-temporary impairments, if any, and the Company's share of the changes in the investee's net asset value since the initial acquisition.
- (b) Partnerships and limited liability company investments where the Company's ownership is minor and the Company does not have significant operating or financial influence are recorded at fair value. Effective January 1, 2019, upon adoption of the updated guidance for financial instruments (see Note 1) changes in fair value of cost-method partnerships are recorded in change in net unrealized gains/losses on fair value option investments. Prior to the adoption of this updated accounting guidance, changes in fair value of cost-method partnerships were recorded in other comprehensive income/loss.

At June 30, 2019, the Company had commitments to invest an additional \$11.6 million in partnerships and limited liability companies.

- (b) On June 28, 2019, Exco Resources, Inc. ("Exco"), an affiliate of Fairfax and the Company, emerged from bankruptcy protection and settled the Company's Exco bonds with common shares, resulting in the company recording a net loss on investment of \$4.6 million (realized losses of \$7.8 million, of which \$7.0 million and \$3.2 million was recorded as unrealized losses in prior quarters and prior years, respectively). See footnote 5.
- (c) Net realized losses on sales of equity securities in the three and six months ended June 30, 2019 included realized foreign exchange losses of \$2.7 million on the return of capital distribution from a privately held common stock investment and a realized loss of \$1.7 million on the conversion of AGT Food and Ingredients Inc. ("AGT") preferred stock to common stock as a result of the AGT privatization transaction. AGT is a majority owned subsidiary of Fairfax (see footnote 5). Realized losses on equity securities in the six months ended June 30, 2019 were partially offset by realized gains of \$1.3 million on the sale of two fair value option common stock investments. Net realized gains on sales of equity securities in the three and six months ended June 30, 2018 represent realized gain on sale of a fair value option common stock investment.

The changes in net unrealized gains/losses on investments recognized as a separate component of stockholders' equity and were as follows:

**Note 3. Derivative Contracts**

Derivative contracts entered into by the Company are considered investments or economic hedges and are not designated as accounting hedges. Derivatives are carried at fair value on the Consolidated Balance Sheets with changes in fair value recorded in the Consolidated Statements of Comprehensive Income (Loss) as net gains/losses on derivatives. The fair value of derivatives in a gain position is presented as derivative assets on the Consolidated Balance Sheets. The fair value of derivatives in a loss position are presented as derivative liabilities on the Consolidated Balance Sheets. The initial premium paid for a derivative contract, if any, would be recorded as a derivative asset and subsequently adjusted for changes in the fair value of the contract at each balance sheet date. Cash settlements related to fair value changes on derivative contracts are also recorded in the Consolidated Statements of Comprehensive Income (Loss) as net gains/losses on derivatives and are recorded as an investing activity in the Consolidated Statements of Cash Flows. Securities received from counterparties as collateral are not recorded as assets of the Company. Securities delivered to counterparties as collateral for derivative contracts are reflected as assets pledged for derivative obligations on the Consolidated Balance Sheets.

The following table summarizes the notional amount, cost and fair value of derivative contracts:

(a) Amounts for total return swaps include net gains (losses) where the Company and its counterparties are required to cash-settle on a quarterly basis the fair value movement since the previous quarterly reset date notwithstanding that the total return swap positions remain open subsequent to the cash settlement.

(b) Change in fair value of total return swaps was measured from the later of the contract inception or most recent cash settlement date prior to the reporting date. Change in fair value of all other derivative contracts is measured from the later of the contract inception date or beginning of the reporting period. Change in fair value of CPI-linked derivatives and foreign exchange forwards include unrealized foreign exchange gains.

### *Equity Derivative Contracts*

The Company's long equity total return swaps allow the Company to receive the total return on a notional amount of an individual equity (including dividends and capital gains or losses) in exchange for the payment of a floating rate of interest on the notional amount. Interest and dividends were recorded in investment income in the Consolidated Statements of Comprehensive Income (Loss). These swaps require no initial net cash investment and at inception the fair value was zero. The Company's long equity total return swaps contain contractual reset provisions requiring counterparties to cash-settle on a quarterly basis any fair value movements arising subsequent to the prior settlement date. To the extent that a contractual reset date did not correspond to the balance sheet date, the Company adjusted the carrying value of the corresponding derivative asset or liability associated with each long equity total return swap contracts to reflect its fair value at the balance sheet date with the offset to net gains/losses on derivatives in the Consolidated Statements of Comprehensive Income (Loss).

*CPI-linked Derivative Contracts*

The Company has purchased derivative contracts referenced to consumer price indexes (“CPI”) in the United States and Europe to serve as an economic hedge against the potential adverse financial impact on the Company of decreasing price levels. In the event of a sale, expiration or early settlement of any of these contracts, the Company would receive the fair value of that contract on the date of the transaction. The Company’s maximum potential loss on any contract is limited to the original cost of that contract. Net unrealized gains (losses) on CPI-linked derivative contracts typically reflect the market’s expectation of decreases (increases) in the values of the CPI indexes underlying these contracts at their respective maturities during the periods presented (these contracts are structured to benefit the Company during periods of decreasing CPI index values). At June 30, 2019, these contracts had a remaining weighted average life of 3 years.

The following table summarizes the notional amounts and underlying CPI Index price (“strike price”) for the Company’s CPI-linked derivative contracts at initiation and the index value at June 30, 2019 and December 31, 2018:

(Notional amount in thousands)	Notional Amount		Weighted Average Strike Price In Original Currency	Index Value

European Union	2,100,000	2,400,604	97.66	104.10
		\$ 7,920,604		

*U.S. Government Bond Forward Contracts*

To reduce its exposure to interest rate risk (specifically exposure to state and local government bonds and long dated U.S. treasury bonds held in its fixed income portfolio), the Company entered into forward contracts to sell long dated U.S. treasury bonds with a notional amount of \$97.0 million and \$94.0 million at June 30, 2019 and December 31, 2018, respectively. These contracts have an average term to maturity of less than one year and may be renewed at market rates.

*Foreign Exchange Forward Contracts*

The Company is currently exposed to currency rate fluctuations through its holding of foreign investments denominated in Euro and in Canadian Dollar. Foreign currency contracts are used to manage certain foreign currency exposures arising from these foreign currency denominated investments. These foreign exchange forwards require no initial net cash investment and at inception the fair value is zero. These contracts have a term to maturity of less than one year and may be renewed at market rates.

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**(UNAUDITED)**

*Counterparty Risk*

The Company endeavors to limit counterparty risk through the terms of master netting agreements negotiated with the counterparties to its derivative contracts. Pursuant to these agreements, the counterparties to these transactions are contractually required to deposit eligible collateral in collateral accounts (subject to certain minimum thresholds) for the benefit of the Company depending on the then current fair value of the derivative contracts. Agreements negotiated with counterparties also provide for a single net settlement of all financial instruments covered by the agreement in the event of default by the counterparty, thereby permitting obligations owed by the Company to a counterparty to be offset to the extent of the aggregate amount receivable by the Company from that counterparty (“net settlement arrangements”).

The following table sets out the Company’s exposure to credit risk related to the counterparties to its derivative contracts:

(In thousands)	June 30, 2019	December 31, 2018
Total derivative assets (a)	\$ 6,238	\$ 9,734
Impact of net settlement arrangements	(2,589)	(9,469)
Fair value of collateral deposited for the benefit of the Company	(1,940)	(265)
<b>Excess of collateral pledged by the Company in favor of counterparties</b>		<b>3,118</b>
Net derivative counterparty exposure after net settlement and collateral arrangements	\$ 1,709	\$ 3,118

(a) Excludes equity warrants with a fair value of \$20,000 at December 31, 2018, which were not subject to counterparty risk.

The net derivative counterparty exposure after net settlement and collateral arrangements relates principally to the timing of collateral placement.

At June 30, 2019 and December 31, 2018, the Company pledged to its counterparties securities with a fair value of \$12.0 million and \$24.6 million, respectively, as independent and mark-to-market collateral for CPI-linked, U.S. Government bond forward and equity long total return swap derivative contracts and recorded these amounts as assets pledged for derivative obligations in the Company’s Consolidated Balance Sheets.

At June 30, 2019, the counterparties pledged \$0.3 million of cash and \$1.8 million of securities, at fair value for the Company’s benefit, compared to \$0.3 million of cash, at December 31, 2018. The Company recorded the cash collateral as other assets and recognized a corresponding liability in its Consolidated Balance Sheets. The Company does not record in its Consolidated Balance Sheets securities pledged by counterparties as collateral for derivatives in a gain position.

*Offsetting of Derivative Assets/Liabilities*

The Company entered into master netting agreements with certain of its derivative counterparties whereby the collateral provided (held) is calculated on a net basis. In accordance with GAAP, the Company elected not to offset derivative assets and liabilities in the Consolidated Balance Sheets for the counterparties with the master netting agreement. The following table summarizes by counterparty (1) the gross and net amounts reflected as derivative assets (excluding equity warrants) and liabilities in the Consolidated Balance Sheets; (2) the gross amounts of the derivative instruments eligible for netting but not offset in the Consolidated Balance Sheets; and (3) financial collateral received and pledged which is contractually permitted to be offset upon an event of default, but is not allowed to be presented net under GAAP (net amount of exposure).

**Note 4. Fair Value Measurements**

Fair values for substantially all of the Company's financial instruments are measured using market or income approaches. Considerable judgment may be required in interpreting market data used to develop estimates of fair value. Accordingly, actual values realized in future market transactions may differ from the estimates presented in these consolidated financial statements. In determining fair value, the Company primarily uses prices and other relevant information generated by market transactions involving identical or comparable assets ("market approach"). The Company also considers the impact of a significant decrease in volume and level of activity for an asset or liability when compared with normal activity to identify transactions that are not orderly.

Fair value measurements are determined under a three level hierarchy that prioritizes the inputs to valuation techniques used to measure fair value, distinguishing between market participant assumptions developed based on market data obtained from sources independent of the reporting entity ("observable inputs") and the reporting entity's own assumptions about market participant assumptions developed based on the best information available in the circumstances ("unobservable inputs"). The hierarchy level assigned to each security carried at fair value is based on the Company's assessment of the transparency and reliability of the inputs used in the valuation of each instrument at the measurement date. The highest priority is given to unadjusted quoted prices in active markets for identical assets (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). Securities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. The Company recognizes transfers between levels at the end of each reporting period in which the transfer is identified. The three hierarchy levels are defined as follows:

**Level 1—** Inputs represent unadjusted quoted prices for identical instruments exchanged in active markets. The fair values of publicly traded equity securities, highly liquid cash management funds and short-term U.S. Government securities are based on published quotes in active markets.

**Level 2—** Inputs include directly or indirectly observable inputs (other than Level 1 inputs) such as quoted prices for similar financial instruments exchanged in active markets, quoted prices for identical or similar financial instruments exchanged in inactive markets and other market observable inputs. The fair value of the vast majority of the Company's investments in fixed maturity securities along with most derivative contracts (including long equity total return swaps, foreign exchange forward contracts and U.S. Government bond forward contracts) are priced based on information provided by independent pricing service providers while much of the remainder are based primarily on non-binding third party broker-dealer quotes that are prepared using Level 2 inputs. Where third party broker-dealer quotes are used, typically at least one quote is obtained from a broker-dealer with particular expertise in the instrument being priced. Certain common stock investments which are measured at fair value using the net asset value per share ("NAV") practical expedient have been excluded.

**Level 3—** Inputs include unobservable inputs used in the measurement of financial instruments. Management is required to use its own assumptions regarding unobservable inputs as there is little, if any, market activity in these instruments or related observable inputs that can be corroborated at the measurement date. Cost-method partnership investments which are measured at fair value using the NAV practical expedient have been excluded. Investments for which NAV is only a component of the fair value measurement continue to be included.

As of December 31, 2018, the Company owned an investment in the preferred stock of AGT Foods and Ingredients Inc. ("AGT"). In April 2019, AGT completed its previously announced management led privatization, resulting in the conversion of the outstanding preferred stock into new AGT Class A common stock ("AGT Stock"). In connection with the privatization, Fairfax, including the Company, as a member of the buying group, extended loans to AGT ("AGT Loans") in order to, among other things, acquire all of the outstanding AGT old common stock shares not already owned by the buying group. Upon closing, Fairfax's total holdings in AGT Stock represented a controlling equity interest in AGT. In connection with the AGT Loans, Fairfax, including the Company, received warrants ("AGT Warrants"). The Company immediately sold the AGT Warrants to Wentworth Insurance Company Ltd. ("Wentworth"), an affiliate of the Company and Fairfax, at cost. The Company classifies its investment in the AGT Loans as Affiliated Corporate Loans in Other Invested Assets. The Company derecognized its investment in AGT preferred stock and recognized a

realized loss of \$1.7 million. As of June 30, 2019, the carrying value of the Company's investment in the AGT Loans and AGT Stock was \$7.8 million and \$5.8 million, respectively.

In February 2018, Fairfax and the Company invested in private placement non-rated debt securities issued by Seaspan Corporation ("Seaspan"), a publicly traded company domiciled in the Marshall Islands. Fairfax and the Company received warrants ("Seaspan Warrants") to purchase Seaspan common stock in connection with this investment. Seaspan became an affiliate of Fairfax and the Company simultaneously with this investment. The Company's share of this investment was \$5.0 million, allocated between \$4.4 million (\$5.0 million par value) in Seaspan corporate bonds and \$0.6 million in Seaspan Warrants. The Company sold its Seaspan Warrants, at fair value, to Wentworth in April 2018 for \$0.6 million. In July 2018, the Company purchased 0.8 million shares of Seaspan Warrants from Wentworth for \$2.8 million and subsequently converted these warrants to purchase an equivalent number of Seaspan common stock shares for \$5.2 million in cash paid to Seaspan. The Company recorded the acquisition of Seaspan affiliated common stock at a cost of \$7.6 million and recognized a loss of \$0.4 million on the conversion of Seaspan Warrants. The Company elected the fair value option of accounting for its investment in Seaspan affiliated common stock. At June 30, 2019 and December 31, 2018, the carrying value of this investment was \$7.8 million and \$6.2 million, respectively. The carrying value of the Company's affiliated investment in Seaspan fixed maturity securities was \$5.1 million and \$4.9 million at June 30, 2019 and December 31, 2018, respectively.

In February 2018, Fairfax completed the sale of its 51.0% ownership interest in the Keg Restaurants Ltd. ("Keg") to Cara Operations Limited ("Cara"), a publicly traded majority-owned subsidiary of Fairfax domiciled in Canada, for consideration comprised of cash and Cara common stock. In 2014, the Company invested in FFHL LP, a wholly-owned limited partnership subsidiary of Fairfax formed to hold the Keg common stock. As a result of the sale of Keg to Cara, the Company received a \$0.6 million cash dividend distribution from FFHL LP and the Company's remaining equity interest in the FFHL LP was redeemed in full in the form of \$11.7 million of Cara common stock. The Company recorded its share of the FFHL LP realized loss on the sale of Keg to Cara of \$0.3 million as part of equity in losses of FFHL LP in investment income. The Company recognized a realized loss on foreign exchange of \$1.2 million upon final redemption of its investment in FFHL LP that was reclassified from unrealized foreign currency translation adjustment previously recorded in equity. Cara was subsequently renamed Recipe Unlimited Corp. ("Recipe"). The Company elected the fair value option of accounting for its investment in Recipe affiliated common stock. At June 30, 2019 and December 31, 2018, the carrying value of this investment was \$11.9 million and \$11.2 million, respectively.

The Company owns common shares in various mutual fund classes of HWIC Asia which is a wholly-owned subsidiary of Fairfax. The Company elected the fair value option of accounting for its investment in HWIC Asia affiliated common stock. At June 30, 2019 and December 31, 2018, the aggregate fair value of these investments was \$38.4 million and \$40.2 million, respectively. Changes in fair value for these investments are recorded in the change in net unrealized gains/losses on fair value option investments in the Consolidated Statements of Comprehensive Income (Loss). During the six months ended June 30, 2019, the Company recorded a net decrease in unrealized gains/losses of \$1.7 million on these investments, compared to a net decrease in unrealized gains/losses of \$5.4 million during the six months ended June 30, 2018.

At December 31, 2018, the Company owned the following investments in Exco Resources, Inc. ("Exco"), an affiliate of Fairfax and the Company: Exco equity-method common stock ("Old Exco Stock", carried at zero as of December 31, 2018), 1.75 and 1.5 Exco Lien Bonds ("Exco Bonds") and private debtor-in-possession loans to Exco ("Exco DIP Loans") classified as Other Investments – Affiliate Corporate Loans in the Consolidated Balance Sheets. Exco filed for bankruptcy restructuring in January 2018. On June 28, 2019, Exco emerged from bankruptcy protection and settled the Company's investments in Exco DIP Loans with \$2.8 million in cash, and in Exco Bonds with newly issued Exco common stock that had a fair value of

**ZENITH NATIONAL INSURANCE CORP. AND SUBSIDIARIES**

**(UNAUDITED)**

\$5.9 million. The Company derecognized its Exco Bonds and recorded a net loss of \$0.8 million in the second quarter of 2019 (realized losses of \$7.8 million, of which \$7.0 million was recorded as unrealized losses in prior quarters). The derecognition of the previously owned Old Exco Stock did not have an impact on the current year investment results as this investment was valued at zero as of December 31, 2018.

At December 31, 2018, the Company owned an investment in the common stock of Grivalia Properties REIC (“Grivalia”), a majority-owned publicly traded subsidiary of Fairfax. The Company recorded this affiliated common stock investment using the equity method of accounting. On May 17, 2019, Grivalia merged into Eurobank Ergasias S.A. (“Eurobank”), as a result of which shareholders of Grivalia, including the Company, received 20.9 million newly issued shares of Eurobank common stock in exchange for each share of Grivalia, with the fair value of \$16.7 million. Accordingly, the Company derecognized its investment in Grivalia and recognized a net realized gain of \$2.7 million on this transaction (\$5.2 million realized gain on sale, partially offset by a \$2.5 million realized loss as a result of the reclassification of the cumulative translation adjustment to earnings). In connection with the merger, on February 5, 2019 Grivalia had paid a pre-merger capital dividend; the Company recorded cash received of \$0.6 million as a reduction of the carrying value of Grivalia prior to the merger. The Company elected the fair value option of accounting for its investment in Eurobank common stock.

In February 2018, Fairfax and the Company entered into a private loan agreement with Farmers Edge, Inc. (“Farmers Edge”), an affiliate of Fairfax and the Company (“Farmers Edge Loan”). Fairfax and the Company also received warrants to purchase Farmers Edge common stock in connection with this loan (“Farmers Edge Warrants”). The Company’s share of this investment was \$4.1 million, allocated between \$3.4 million (Canadian \$5.0 million par value) in Farmers Edge Loan and \$0.7 million in Farmers Edge Warrants, as estimated by HWIC. The Company sold the Farmers Edge Warrants to Wentworth on the same day they were acquired, substantially at cost. In February 2019, the Company invested an additional CAD \$4.0 million in Farmers Edge Loans. Farmers Edge Loans are included in Other Investments – Affiliate Corporate Loans in the Consolidated Balance Sheets. At June 30, 2019 and December 31, 2018, the total carrying value of the Farmers Edge Loans was \$6.9 million and \$3.7 million, respectively. The Company also owns 5.3 million shares of Farmers Edge equity-method common stock, with a carrying value of \$7.7 million and \$9.6 million at June 30, 2019 and December 31, 2018, respectively.

The Company owns an investment in common stock of Boat Rocker Media Inc. (“Boat Rocker”), a majority-owned subsidiary of Fairfax. In March 2019, the Company sold a portion of the investment to a third party for \$0.4 million and recognized a realized gain on the sale of \$0.3 million. The carrying value of this equity-method common stock investment was \$14.5 million at June 30, 2019.

*Other*

The Company continues to be a party to various reinsurance treaties with affiliates of Fairfax that were entered into in the ordinary course of business, primarily excess of loss reinsurance agreements with Odyssey Re for 2010 through 2019. At June 30, 2019 and December 31, 2018, the Company recorded net reinsurance recoverables of \$0.6 million and \$1.0 million, respectively, related to the reinsurance transactions with the affiliates of Fairfax.

Zenith National paid Fairfax \$0.1 million in each of the six months ended June 30, 2019 and 2018, respectively, for the cost of the open market purchase made by Fairfax on Zenith National’s behalf of Fairfax Subordinate Voting Shares granted to certain officers under the Restricted Stock Plan.

In April 2015, Zenith National entered into an agreement with MFXchange US, Inc., an indirect, wholly-owned subsidiary of Fairfax, to provide information technology services to Zenith National. The Company recorded

expenses of \$22,000 and \$44,000 and \$22,000 and \$43,000, respectively, in the three and six months ended June 30, 2019, and 2018.

In November 2014, the Company entered into a Master Administrative Services Agreement with various affiliates of Fairfax. Under the agreement, the affiliated parties provide and receive administration services such as accounting, underwriting, claims, reinsurance, preparation of regulatory reports, and actuarial services. The Company began providing claims processing services for Seneca Insurance Company, Inc. ("Seneca") under this agreement in March 2016 and recorded service fee income of \$0.1 million and \$0.2 million in the three and six months ended June 30, 2019 and 2018, respectively, in the Consolidated Statements of Comprehensive Income (Loss) which was substantially offset by costs of dedicated staff and allocated shared services. Other liabilities at both June 30, 2019 and December 31, 2018 include a loss fund of \$0.6 million maintained by the Company to process future workers' compensation claim payments on behalf of Seneca.

In March 2013, the Company entered into an agreement with TIG Insurance Company ("TIG") to become their primary workers' compensation claims service provider. The Company recorded service fee income of \$1.9 million and \$3.9 million and \$2.2 million and \$4.4 million, in the three and six months ended June 30, 2019 and 2018, respectively, in the Consolidated Statements of Comprehensive Income (Loss) which is substantially offset by costs of dedicated staff and allocated shared services. Other liabilities at June 30, 2019 include a net liability of \$2.9 million which includes net loss fund liability of \$4.2 million reduced by a service fee income receivable of \$1.3 million. Other liabilities at December 31, 2018 include a net liability of \$3.2 million which includes net loss fund liability of \$4.0 million reduced by a service fee income receivable of \$0.8 million.

**Note 6. Reinsurance Recoverable**

Amounts recoverable for paid and unpaid losses from reinsurers at June 30, 2019 and December 31, 2018 and their respective A.M. Best ratings were as follows:

**Note 10. Commitments and Contingencies**

The Company is involved in various litigation proceedings that arise in the ordinary course of business. Disputes adjudicated in the workers' compensation administrative systems may be appealed to review boards or civil courts, depending on the issues and local jurisdictions involved. From time to time, plaintiffs also sue the Company on theories falling outside of the exclusive jurisdiction and remedies of the workers' compensation claims adjudication systems. Certain of these legal proceedings seek injunctive relief or substantial monetary damages, including claims for punitive damages, which may not be covered by

reinsurance agreements. Historically, the Company has not experienced any material exposure or damages from any of these legal proceedings. In addition, in the opinion of management, after consultation with legal counsel, currently outstanding litigation is either without merit or the ultimate liability, if any, is not expected to have a material adverse effect on the Company's consolidated financial condition, results of operations or cash flows.

**Note 11. Leases**

The Company adopted of the updated accounting guidance for leases as of January 1, 2019 (see Note 1). The majority of the Company's property or office leases include an option to extend or renew the lease term. The exercise of the renewal option is at the Company's discretion. The operating lease liability includes lease payments related to options to extend or renew the lease term if the Company is reasonably certain of exercising those options. The Company utilizes a risk-free interest rate for periods comparable to the term of the underlying lease to determine the present value of lease payments.

Lease expense for the six months ended June 30, 2019 and 2018 was \$4.6 million and \$4.3 million, respectively.
