Report of Independent Auditors

To the Management of Zenith National Insurance Corp.

We have audited the accompanying consolidated financial statements of Zenith National Insurance Corp. and its subsidiaries, which comprise the consolidated balance sheets as of December 31, 2019 and 2018, and the related consolidated statements of comprehensive income, of stockholders' equity and of cash flows for the each of the three years in the period ended December 31, 2019.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on the consolidated financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the Company's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Zenith National Insurance Corp. and its subsidiaries as of December 31, 2019 and 2018, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2019, in accordance with accounting principles generally accepted in the United States of America.

Other Matter

Accounting principles generally accepted in the United States of America require that information about incurred and paid claims development that precedes the current reporting period and the historical claims payout percentages included in Note 8 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Financial Accounting Standards Board (FASB) who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Note 1. Basis of Presentation and Summary of Operations

Basis of Presentation

The accompanying Consolidated Financial Statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") and include Zenith National Insurance Corp. ("Zenith National") and its subsidiaries. All intercompany transactions and balances have been eliminated in consolidation.

Organization and Operations

Zenith National is a Delaware holding company, which is an indirect wholly-owned subsidiary of Fairfax Financial Holdings Limited ("Fairfax"). Fairfax is a Canadian financial services holding company, whose common stock is publicly traded on the Toronto Stock Exchange, and is principally engaged in property and casualty insurance, reinsurance and associated investment management.

Zenith National's wholly-owned subsidiaries (primarily Zenith Insurance Company ("Zenith Insurance")), specialize in the workers' compensation insurance business nationally and, since 2010, in the property-casualty business for California agriculture. Unless otherwise indicated, all references to the "Company" refer to Zenith National together with its subsidiaries.

The accompanying Consolidated Financial Statements differ from the financial information published by Fairfax in regards to the Company primarily due to differences between GAAP and International Financial Reporting Standards ("IFRS") the reporting basis used by Fairfax, differences in accounting by Fairfax for certain investments owned by the Company and accounting adjustments recorded by Fairfax related to the acquisition of the Company.

Use of Estimates

GAAP requires the use of assumptions and estimates in reporting certain assets and liabilities and related disclosures. Actual results could differ from those estimates.

Reclassifications

Certain prior year amounts in the accompanying consolidated financial statements have been reclassified and amended to conform to the current year presentation.

Subsequent Events

The Company evaluated subsequent events through the date and time that the Consolidated Financial Statements were issued on February 24, 2020.

Note 2. Summary of Accounting Policies

Investments

At both December 31, 2019 and 2018, $1.5 billion of investments in fixed maturities, equity securities and short-term investments, as well as cost-method partnerships at December 31, 2019, were recorded under the fair value option; these investments are carried at fair value, with changes in fair value recorded in the change in net unrealized gain/losses on fair value option investments in the Consolidated Statements of Comprehensive Income. At December 31, 2018, $16.1 million of investments in equity securities were classified as available-for-sale, and $22.0 million of investments in cost-method partnerships were included in other investments; these investments were carried at fair value with changes in unrealized gains and losses

excluded from net income and reported in a separate component of stockholders' equity, net of tax. Effective January 1, 2019, upon adoption of the updated guidance for financial instruments, all equity securities and cost-method partnerships are recorded using the fair value option (see Adopted Accounting Standards, Recognition and Measurement of Financial Assets and Financial Liabilities section below).

Other investments at December 31, 2019 and 2018 are comprised of investments in partnerships and limited liability companies, investments in equity-method common stock and loans to affiliates. Partnerships and limited liability company investments where the Company's ownership is minor and the Company does not have significant operating or financial influence ("cost-method partnerships") are carried at fair value. Effective January 1, 2019, changes in fair value for these investments are recorded in the change in net unrealized gain/losses on fair value option investments in the Consolidated Statements of Comprehensive Income. Investments in partnerships and limited liability companies where the Company's ownership share is more than minor as well as investments in common stock of an entity over which the Company is deemed to have significant influence are recorded under the equity-method of accounting, unless the fair value option is elected. The carrying value of the Company's investments in equity-method partnerships and common stock represents the initial cost, adjusted for any additional purchases/distributions, other-than-temporary impairments, if any (as discussed below), and the Company's share of the changes in the investee's net asset value ("NAV") since the initial acquisition. Loans to affiliates are carried at fair value, with changes in fair value recorded in the change in net unrealized gain/losses on fair value option investments in the Company's Consolidated Statements of Comprehensive Income.

Investments could be subject to default by the issuer or declines in fair value that become other-than-temporary. The Company continually assesses the prospects for its investments, other than fair value option investments, as part of its ongoing portfolio management, including the identification of other-than-temporary declines in fair value. The Company's other-than-temporary assessment includes reviewing the extent and duration of declines in fair value of such investments below the cost or amortized cost basis or carrying value, the seniority and duration of the securities, historical and projected company financial performance, company-specific news and other developments, the outlook for industry sectors, credit ratings, and macro-economic changes, including government policy initiatives. An other-than-temporary impairment is recognized in net income and reflected as a reduction in the cost basis or carrying value of the security based on the extent and duration that its fair value is below cost or carrying value, in addition to issuer specific events. The Company recorded other-than-temporary impairments of $11.6 million, none and $0.9 million on equity-method common stock investments in the years ended December 31, 2019, 2018 and 2017, respectively. The Company recorded other-than-temporary impairments of $1.3 million and $0.1 million on cost-method partnerships in the years ended December 31, 2018 and 2017. The Company recorded an other-than-temporary impairment of $0.2 million on one available-for-sale common stock investment in the year ended December 31, 2017.

Investment income is recorded when earned. Realized capital gains and losses are determined under the "average cost" method.

Derivative Contracts

Derivative contracts may include interest rate and total return swaps, consumer price index linked ("CPI-linked"), currency options and forwards, warrants and option contracts, all of which derive their value mainly from changes in underlying interest rates, foreign exchange rates, inflation indexes or equity instruments. A derivative contract may be traded on an exchange or over-the-counter ("OTC"). OTC derivative contracts are individually negotiated between contracting parties and may include the Company's forwards and foreign currency option contracts, CPI-linked derivatives and total return swaps.

The Company uses derivatives principally to mitigate financial risks arising from its investment holdings, and monitors the derivatives for effectiveness in achieving their risk management objectives. Derivative contracts

entered into by the company are considered investments or economic hedges and are not designated as hedges for financial reporting.

Derivatives are carried at fair value. The fair value of derivative contracts in a gain position is presented as derivative assets in the Consolidated Balance Sheets. The fair value of derivative contracts in a loss position is presented as derivative liabilities in the Consolidated Balance Sheets. The initial premium paid for a derivative contract, if any, would be recorded as a derivative asset and subsequently adjusted for changes in fair value of the contract at each balance sheet date. Changes in fair value of derivatives are recorded in the Consolidated Statements of Comprehensive Income as net gains (losses) on derivatives, with a corresponding adjustment to the carrying value of the derivative asset or liability. Cash settlements related to fair value changes on derivative contracts are also recorded in the Consolidated Statements of Comprehensive Income as net gains (losses) on derivatives, and are recorded as an investing activity in the Consolidated Statements of Cash Flows.

Cash received from counterparties as collateral for derivative contracts is recorded as other assets in the Consolidated Balance Sheets, and a corresponding liability is recognized as other liabilities. Securities pledged by counterparties as collateral for derivatives in a gain position are not recorded as assets of the Company. Securities pledged to counterparties by the Company as collateral for derivative contracts in a loss position, as well as contractually required independent collateral, are reflected in the Consolidated Balance Sheets as assets pledged for derivative obligations.

See Note 4 for additional information related to derivative contracts.

Cash

Cash includes demand deposits with financial institutions.

Recognition of Property-Casualty Revenue and Expense

Revenue Recognition

The consideration paid for an insurance policy is generally known as a “premium.” Premiums billed to the Company’s policyholders are recorded as revenues in the Consolidated Statements of Comprehensive Income. Premiums are billed and collected according to policy terms, predominantly in the form of installments during the policy period. Premiums are earned pro-rata over the terms of the policies. Billed premiums applicable to the unexpired terms of policies in-force are recorded in the accompanying Consolidated Balance Sheets as a liability for unearned premiums.

Certain states in which the Company conducts business require that the Company bill additional amounts, or assessments, to policyholders in accordance with state statutes. In some cases, the Company is required to pay in advance estimated amounts of these assessments to the relevant regulatory agency. Premiums do not include these assessments and their collection does not have any impact on the Company’s results of operations.

Any amounts receivable for billed premiums are charged-off upon initiating the legal collection process. An estimate of amounts that are likely to be charged-off is established as an allowance for doubtful accounts as of the balance sheet date. The estimate is comprised of any specific accounts that are past due and are considered probable to be charged-off and a provision against remaining accounts receivable based on historical bad debt expense. Premiums receivable is reported net of an allowance for estimated uncollectible amounts which was $0.3 million and $0.8 million at December 31, 2019 and 2018, respectively.

Workers’ compensation premiums are determined based upon the payroll of the insured, the applicable premium rates and, where applicable, an experience-based modification factor and a debit or credit applied

by the Company's underwriters based upon individual risk characteristics. Audits of policyholders' records are conducted after policy expiration to make a final determination of applicable premiums. Included with premiums earned is an estimate of the impact of final audit premiums. The Company can estimate this adjustment because it monitors, by policy, how much additional premium will be billed or refunded in final audit invoices as a percentage of the original estimated amount that was billed. The Company uses the historical percentage and current trends to estimate the probable amount to be billed or refunded as of the balance sheet date. When payrolls decline during policy periods (such as during a recession), the Company may bill more premium than is actually owed and will establish liability for the estimated amount to be refunded to its policyholders. When payrolls increase during policy periods, the Company may bill less premium than is actually owed and will establish a receivable for the estimated amount due from its policyholders. Included in premiums receivable was $5.4 million and $4.8 million at December 31, 2019 and 2018, respectively, for estimated additional amounts of premiums to be billed to the Company's policyholders.

The Company has written a relatively small number of workers' compensation policies that are retrospectively rated. Under this type of policy, subsequent to policy expiration, the policyholder may be entitled to a refund or owe additional premium based on the amount of losses sustained under the policy. These retrospective premium adjustments are limited in the amount by which they increase or decrease the standard amount of premium applicable to the policy. The Company can estimate these retrospective premium adjustments because it knows the underlying loss experience of the policies involved. At December 31, 2019 and 2018, the net premiums payable under retrospectively rated workers' compensation policies reflected in unearned premiums was $1.6 million and $1.3 million, respectively.

Losses and Loss Adjustment Expenses Incurred

Losses and loss adjustment expenses incurred in the accompanying Consolidated Statements of Comprehensive Income include provisions for the amount the Company expects to ultimately pay for all reported and unreported claims for the applicable periods. Loss adjustment expenses are the expenses applicable to the process of administering, settling and investigating claims, including related legal expenses.

Estimates of losses from environmental and asbestos related claims are included in overall loss reserves and to date have not been material.

Unpaid Losses and Loss Adjustment Expenses

The liabilities for unpaid losses and loss adjustment expenses ("loss reserves") in the accompanying Consolidated Balance Sheets are estimates of the unpaid amounts that the Company expects to pay for the ultimate cost of reported and unreported claims as of the balance sheet date. Loss reserves are estimates and are inherently uncertain; they do not and cannot represent an exact measure of ultimate liability. The Company's actuaries perform a comprehensive review of loss reserves at the end of every quarter, from which a point estimate of loss reserves is determined. The loss reserve estimates recorded in the financial statements reflect management's best estimate of loss reserves based on the actuarial point estimate as well as judgment regarding the inherent uncertainties of ultimate loss costs. There is no material difference between the actuarial point estimate and the loss reserve estimate recorded in the financial statements at December 31, 2019 and 2018. At December 31, 2019, workers' compensation, the Company's principle line of insurance, accounts for 91% of the net earned premium in 2019 and 94% of the outstanding liabilities for unpaid losses and loss adjustment expenses, net of reinsurance recoverable. Given the long-tail nature of workers' compensation liabilities, the ultimate losses will not be known for many years and estimating loss reserves is a complex process which involves a combination of actuarial techniques and management judgment including the consideration of all relevant data.

The Company's actuaries produce a point estimate for workers' compensation loss reserves using the results of various methods of estimation. The actuaries prepare reserve estimates for all accident years using the

Company's historical claims data and many of the common actuarial methodologies for estimating loss reserves, such as paid loss development methods, incurred loss development methods, the Bornhuetter-Ferguson methods and methods that utilize claim counts and average severity. The actuarial point estimate is based on a selection of the results of these various methods depending upon both the age of the accident year and the geographic state of the injury. For mature accident years, all of the methods produce very similar loss estimates; the actuarial point selections are primarily based upon incurred loss development methods because the actuaries believe this most accurately reflects the required reserves for the relatively few claims that remain open. For recent accident years, the Bornhuetter-Ferguson methods and methods that utilize claim counts and average severity are weighted with paid and incurred loss development methods.

When losses are reported to the Company, it establishes individual estimates of the ultimate cost of the claims, known as "case reserves." These case reserves are continually monitored and revised in response to new information and for amounts paid. The Company's actuaries use this information about reported claims in some of their estimation techniques. In estimating the Company's total loss reserves, the Company makes provision for two types of loss development. At the end of any calendar period, there are a number of claims that have not yet been reported but will arise out of accidents that have already occurred. These are referred to in the insurance industry as incurred but not reported ("IBNR") claims and the Company's loss reserves contain an estimate for IBNR claims. In addition to this provision for late reported claims, the Company also has to estimate, and make provision for, the extent to which the case reserves on known claims may also develop. These types of reserves are referred to in the insurance industry as "bulk" reserves. The Company's loss reserves make provision for both IBNR and bulk reserves in total, but not separately. The large majority of claims are reported promptly and therefore, as of the balance sheet date, the number of IBNR claims is relatively insignificant.

The principal uncertainty in the Company's workers' compensation loss reserve estimates is the risk of increasing claim costs, particularly medical. In estimating loss reserves, the Company's actuaries consider medical costs by evaluating long-term trends. The additional uncertainties considered in estimating ultimate loss costs include the ultimate number of expensive cases and the length of time required to settle long-term expensive cases. Expensive claims are those involving permanent disability of an injured worker and are paid over many years. The ultimate costs of expensive claims are difficult to estimate because of such factors as the on-going and possibly increasing need for medical care, complications from comorbidity, the duration of disability, life expectancy and benefits for dependents, as well as increased costs associated with obtaining settlement approval from Medicare.

The greater part of the challenge in estimating the loss reserves is associated with estimating the year-over-year increase (or decrease) in average claim severity for each accident year. Year-over-year rates of change of workers' compensation average claim severity (severity trends/inflation) vary considerably. The Company's initial workers' compensation loss reserve estimates for recent accident years provide for claim severity trends that contemplate the long-term trend observed in the Company's business. As loss experience emerges, actuarial estimates of ultimate losses and severity trends converge with those of the traditional dollar based loss development methods, resulting in net favorable or unfavorable development of the total loss reserve estimate.

Different assumptions about the claim severity inflation rates would change the workers' compensation loss reserve estimates; a material change is reasonably possible although management cannot predict if, when and to what extent such a change will occur. If the average annual inflation rate for each of the accident years 2017 through 2019 were increased or decreased by one percentage point in each year, the loss reserve estimates at December 31, 2019 would change accordingly by approximately $18.7 million.

The Company believes its loss reserve estimates are adequate. However, the ultimate losses will not be known with any certainty for several years. The Company evaluates its loss reserve estimates every quarter

to reflect the most current data and judgments. Any resulting adjustments to loss reserves are reflected in the Company's Consolidated Statements of Comprehensive Income in the period in which the change is made.

Deferred Policy Acquisition Costs

Policy acquisition costs, consisting of agent commissions and premium taxes that vary with, and are primarily related to, the production of new or renewal business are deferred and amortized as the related premiums are earned.

A premium deficiency is recognized if the sum of expected losses and loss adjustment expenses, expected dividends to policyholders, unamortized acquisition costs and policy maintenance costs exceeds the remaining unearned premiums. A premium deficiency would first be recognized by charging any unamortized acquisition costs to expense to the extent required to eliminate the deficiency. If the premium deficiency were greater than unamortized acquisition costs, a liability would be accrued for the excess deficiency. The Company does not consider anticipated investment income when determining if a premium deficiency exists. There was no premium deficiency at December 31, 2019 or 2018.

Policyholders' Dividends

The Company issues certain policies in which the policyholder may qualify to receive a dividend. An estimated provision for workers' compensation policyholders' dividends is accrued as the related premiums are earned. Such dividends do not become a fixed liability unless and until declared by the respective Board of Directors of Zenith National's insurance subsidiaries. The dividend to which a policyholder may be entitled is set forth in the policy. Dividends are calculated after policy expiration. The Company is able to estimate any liability it may have because it knows the underlying loss experience of the policies it has written with dividend provisions and can estimate the future liability from the policy terms. Approximately 49% of the Company's workers' compensation net premiums were earned from participating policies with dividend provisions.

State Guaranty Fund Assessments

Guaranty funds ("Guaranty Funds") exist in several states to ensure that policyholders (holders of direct insurance policies but not of reinsurance policies) receive payment of their claims if insurance companies become insolvent. A Guaranty Fund is funded primarily by statutorily required assessments on insurance companies doing business in the state. Various mechanisms exist in some of these states for assessed insurance companies to recover these assessments. Upon the insolvency of an insurance company, the Guaranty Funds become primarily liable for the payment of the insolvent company's liabilities to policyholders. The declaration of an insolvency establishes the presumption that assessments by the Guaranty Funds are probable. The Company writes workers' compensation insurance in many states in which unpaid workers' compensation liabilities are the responsibility of the Guaranty Funds and has received, and expects to continue to receive, Guaranty Fund assessments, some of which may be based on a certain amount of the premiums it has already earned as of December 31, 2019.

The Company recorded an estimate of $1.6 million and $1.4 million for the expected net liability at December 31, 2019 and 2018, respectively, for Guaranty Fund assessments. The ultimate impact of such assessments will depend upon the amount and timing of actual assessments and of any recoveries to which the Company may be entitled.

Reinsurance Ceded

In the ordinary course of business and in accordance with general insurance industry practices, the Company purchases excess of loss reinsurance to protect it against the impact of large, irregularly occurring losses in the workers' compensation business. Such reinsurance reduces the magnitude of such losses on net income

and the capital of the Company. Reinsurance makes the assuming reinsurer liable to the ceding company to the extent of the reinsurance. It does not, however, discharge the ceding company from its primary liability to its policyholders in the event the reinsurer is unable to meet its obligations under such reinsurance agreement. The Company monitors the financial condition of its reinsurers and does not believe that it is currently exposed to any material credit risk through its ceded reinsurance arrangements because most of its reinsurance is recoverable from large, well-capitalized reinsurance companies. As such, the Company did not record an allowance for uncollectible recoverables from its reinsurers. Historical write-offs have been infrequent and insignificant.

Premiums earned and losses and loss adjustment expenses incurred are stated in the accompanying Consolidated Statements of Comprehensive Income after deduction of amounts ceded to reinsurers. Balances due from reinsurers on unpaid losses, including an estimate of such recoverables related to reserves for IBNR losses, are reported as assets and are included in reinsurance recoverables even though amounts due on unpaid losses and loss adjustment expenses are not recoverable from the reinsurer until such losses are paid.

In 1998, Zenith Insurance acquired substantially all of the assets and certain liabilities of RISCORP, Inc. and certain of its subsidiaries (collectively, “RISCORP”) related to its workers’ compensation business. Also, in 1998, the Company entered into an aggregate excess of loss reinsurance agreement which provided ceded reinsurance for unpaid losses assumed by Zenith Insurance from RISCORP up to $50.0 million in excess of $182.0 million. In May 2018, the Company commuted this retroactive reinsurance agreement, received $3.0 million in cash, eliminated a deferred gain of $0.4 million and recorded a total gain of $0.6 million.

Properties and Equipment

Properties and equipment used in operations, including certain costs incurred to develop and obtain computer software, are capitalized and carried at cost less accumulated depreciation. Depreciation is calculated on a straight-line basis using the following useful lives: buildings — up to 40 years; and other property and equipment — 3 to 10 years. Expenditures for maintenance and repairs are charged to operations as incurred. Additions and improvements to buildings and other fixed assets are capitalized and depreciated over the useful lives of the properties and equipment. Upon disposition, the asset cost and related depreciation are removed from the accounts and the resulting gain or loss is included in the Company’s results of operations.

Intangible Assets

At December 31, 2019 and 2018, goodwill from acquisitions was $21.0 million, of which $19.0 million is included in the assets of Zenith Insurance with the remaining $2.0 million included in Zenith National’s assets. Other than goodwill, the Company had no intangible assets at December 31, 2019 or 2018. The Company tests goodwill for impairment annually and more frequently if an event occurs or circumstances change that management determines would more likely than not reduce the fair value of a reporting unit below its carrying amount. A reporting unit is an operating segment or a unit one level below the operating segment. The impairment tests include a comparison of the carrying amount of goodwill to the present value of future cash flows of both the Company’s total workers’ compensation business and the Southeast region workers’ compensation business operation, a reporting unit. The fair value, estimated based on the present value of future cash flows of the reporting unit, exceeded its carrying amount as of December 31, 2019. Therefore, goodwill of the reporting unit is not considered impaired.

Restricted Stock

Under a restricted stock plan adopted by Fairfax in September 2010 (“Restricted Stock Plan”), certain Company officers are awarded shares of Fairfax Subordinate Voting Shares, no par value, with restricted ownership rights (“Restricted Stock”). Vesting of shares awarded in 2012 through November 2014 were

conditioned upon the Company meeting a performance criterion in either the third, fourth or fifth year following the award date, with vesting to occur in three equal consecutive annual installments following the first year in which the condition was met. The Restricted Stock awarded after 2014 vests on the fifth anniversary of the award date and contains no performance conditions. The Restricted Stock vests in full upon the death or disability of the recipient of Restricted Stock. Restricted Stock is generally forfeited by employees who terminate employment prior to vesting. During the vesting period, the Restricted Stock Plan participants are entitled to voting rights and ordinary cash dividends paid by Fairfax from the date of the award. Restricted Stock awards under the Restricted Stock Plan are accounted for as equity awards based on the amount paid by the Company for the open market purchase of Fairfax Subordinate Voting Shares prior to each award. Compensation expense is recognized over the vesting period based on the grant date fair value with an offsetting entry to the initial charge to the Company's stockholders' equity.

Adopted Accounting Standards

Below is information regarding accounting standards that the Company adopted during the periods for which the Financial Statements have been presented.

Leases

Effective January 1, 2019, the Company adopted the updated guidance for leases and elected to utilize an option to record a cumulative-effect adjustment to the opening balance of retained earnings for the year of adoption. Accordingly, the Company's reporting for the comparative period prior to adoption continues to be presented in the financial statements in accordance with previous lease accounting guidance. The Company elected the available practical expedients upon adoption. The adoption of the updated guidance resulted in the Company recognizing a right-of-use asset of $25.5 million and a lease liability of $27.0 million in the Consolidated Balance Sheet, as well as de-recognizing the liability of $1.5 million for deferred rent that was required under the previous guidance, for its office lease agreements as of January 1, 2019. The cumulative effect adjustment to the opening balance of retained earnings was zero. The adoption of the updated guidance did not have a material effect on the Company's results of operations or cash flows (see Note 15).

Recognition and Measurement of Financial Assets and Financial Liabilities

Effective January 1, 2019, the Company adopted the updated guidance for the recognition, measurement, presentation and disclosure of certain financial instruments. The updated guidance requires equity investments, except those accounted for under the equity-method of accounting, that have readily determinable fair value to be measured at fair value with any changes in fair value recognized in net income. Equity securities that do not have readily determinable fair values may be measured at estimated fair value or cost less impairment, if any, adjusted for subsequent observable price changes, with changes in the carrying value recognized in net income. A qualitative assessment for impairment is required for equity investments without readily determinable fair values. The updated guidance also eliminates the requirement to disclose the method and significant assumptions used to estimate the fair value of financial instruments measured at amortized cost on the balance sheet. Upon adoption of this guidance on January 1, 2019, $4.2 million of pre-tax net unrealized losses on equity investments previously classified as available-for-sale and $0.3 million of pre-tax net unrealized gains on cost-method partnership investments were reclassified from accumulated other comprehensive loss ("AOCL") to retained earnings. The change in accounting for equity securities and cost-method partnership investments did not affect the Company's total shareholders' equity and the after-tax net unrealized losses of $3.1 million reclassified to retained earnings will never be recognized in net income.

Cash Flows Classifications

Effective January 1, 2019, the Company adopted the updated guidance on the classification of cash flows related to certain activities in the statement of cash flows to reduce diversity in practice. Under the new guidance, distributions received on equity-method investments shall be classified in operating or investing activities in the statement of cash flows using either a cumulative earnings or the nature of distribution approach. The Company elected to apply the nature of distribution approach, under which distributions received are classified on the basis of the nature of the activity or activities of the investee that generated the distribution as either a return on investment (classified as a cash inflow from operating activities) or a return of investment (classified as a cash inflow from investing activities) when such information is available. The adoption of this guidance did not have a material impact on the Company's Statement of Cash Flows.

Reclassification of the Stranded Tax Effects Related to The Tax Cuts and Jobs Act of 2017 ("Act")

In February 2018, the Financial Accounting Standards Board ("FASB") issued updated guidance that allows a reclassification from AOCL to retained earnings for the stranded tax effects resulting from the enactment of the Act. The Company early adopted this amended guidance as of January 1, 2018, and as a result, elected to reclassify a total of $0.8 million in stranded tax effects from AOCL to retained earnings as of January 1, 2018.

Recent Accounting Standards Not Yet Adopted

Measurement of Credit Losses on Financial Instruments

In June 2016, the FASB issued new guidance which requires a financial asset (or a group of financial assets) measured at amortized cost to be presented at the net amount expected to be collected. The allowance for credit losses is a valuation account that is deducted from the amortized cost basis of the financial asset(s) to present the net carrying value of the amount expected to be collected on the financial asset. The guidance broadens the information that an entity must consider in developing its expected credit loss estimate for assets measured either collectively or individually; measurement of expected credit losses shall be based on relevant information about past events, including historical experience, current conditions, and reasonable and supportable forecasts that affect the collectability of the reported amount. Furthermore, the new guidance changes accounting for available-for-sale debt securities that were previously recorded at fair value with changes in fair value recorded in Other comprehensive income (loss). The new guidance requires available-for-sale securities to be recorded at amortized cost, with an estimate of credit losses to be recorded through an allowance for credit losses; and an entity is able to record reversals of credit losses in current period net income. In May 2019, the FASB issued updated guidance that provides transition relief by providing entities with an alternative to irrevocably elect the fair value option for eligible financial assets measured at amortized cost upon the adoption of the credit losses standard. To be eligible for the transition election, the existing financial asset must otherwise be both within the scope of the new credit losses standards and eligible for applying the fair value option standard (effectively can be elected for available-for-sale debt securities carried at amortized cost under the new guidance). The election must be applied on an instrument-by-instrument basis and is not available for held-to-maturity debt securities. The guidance is effective for annual periods beginning after December 15, 2020 and interim periods thereafter. All entities may adopt this guidance as early as periods beginning after December 15, 2018. The guidance is not expected to have a material impact on the Company's consolidated financial position, results of operations or cash flows.

Goodwill Impairment

In January 2017, the FASB issued new guidance to simplify how an entity is required to test goodwill for impairment by eliminating Step 2 from the goodwill impairment test. Step 2 measures a goodwill impairment loss by comparing the implied fair value of a reporting unit's goodwill with the carrying amount of that goodwill. Under the new guidance, entities will record an impairment charge based on the excess of a

reporting unit's carrying amount over its fair value. The guidance is effective for annual periods or any interim goodwill impairment tests beginning after December 15, 2021. Early adoption is permitted. The guidance is not expected to have a material impact on the Company's consolidated financial position, results of operations or cash flows.

Callable Debt Securities – Accounting for Premium Amortization

In March 2017, the FASB issued updated guidance to shorten the amortization period for certain callable debt securities purchased at a premium. The guidance requires the premium to be amortized to the earliest call date; however, securities purchased at a discount will continue to be amortized to maturity. The guidance is effective for annual periods beginning after December 15, 2019, and interim periods thereafter. Early adoption is permitted. This guidance is not expected to have a material impact on the Company's consolidated financial position, results of operations or cash flows.

Changes to the Disclosure Requirements for Fair Value Measurements

In August 2018, the FASB issued updated guidance which changes the fair value measurement disclosure requirements. The updated guidance removes certain disclosure requirements regarding the amounts and reasons for transfers between Level 1 and Level 2 of the fair value hierarchy and the policy for timing of transfers between the levels. The updated guidance also adds disclosure requirements regarding unrealized gains and losses included in Other comprehensive income (loss) for recurring Level 3 fair value measurements and the range and weighted average of unobservable inputs used in Level 3 fair value measurements. The updated guidance is effective for all entities for periods beginning after December 15, 2019, including interim periods therein. The guidance is not expected to have a material impact on the Company's financial statements.

Accounting for Cloud Computing Implementation Costs

In August 2018, the FASB issued updated guidance to reduce complexity for the accounting for costs of implementing a cloud computing service arrangement. The new guidance aligns the requirements for capitalizing implementation costs incurred in a hosting arrangement that is a service contract with the requirements for capitalizing implementation costs incurred to develop or obtain internal-use software. The updated guidance is effective for reporting periods beginning after December 15, 2020. Early adoption is permitted. The guidance is not expected to have a material impact on the Company's consolidated financial position, results of operations or cash flows.

Accounting for Variable Interest Entities

In October 2018, the FASB issued new guidance that expands the application of a specific private company accounting alternative related to variable interest entities and changes how entities evaluate decision-making fees under the variable interest guidance. In addition, entities will consider indirect interests held through related parties under common control on a proportionate basis rather than in their entirety. Entities are required to apply the amendments retrospectively. The guidance is effective for reporting periods beginning after December 15, 2020 and interim periods thereafter. Early adoption is permitted. The guidance is not expected to have a material impact on the Company's consolidated financial position, results of operations or cash flows.

Note 3. Investments

The cost or amortized cost and fair value of investments recorded at fair value at December 31, 2019 and 2018 were as follows:

(In thousands)	Cost or Amortized Cost	Gross Unrealized Gains	Gross Unrealized (Losses)	Fair Value
December 31, 2019				
Fair value option investments:				
Fixed maturity securities:				
State and local government debt	$ 55,655	$ 38,741		$ 94,396
U.S. Government debt (a)	962,622	2,071	$ (20)	964,673
Corporate debt	22,167	1,394	(420)	23,141
Total fixed maturity securities	1,040,444	42,206	(440)	1,082,210
Short-term investments (b)	159,531	133	(3)	159,661
Equity securities	238,063	26,055	(70,365)	193,753
Other investments – affiliate corporate loans	15,712	811		16,523
Other investments – cost-method partnerships	29,649	2,794	(2,570)	29,873
Total fair value option investments	**$ 1,483,399**	**$ 71,999**	**$ (73,378)**	**$ 1,482,020**
December 31, 2018				
Fair value option investments:				
Fixed maturity securities:				
State and local government debt	$ 87,607	$ 17,363		$ 104,970
U.S. Government debt (a)	983,019	1,245	$ (785)	983,479
Corporate debt	52,817	825	(3,890)	49,752
Total fixed maturity securities	1,123,443	19,433	(4,675)	1,138,201
Short-term investments (b)	128,335			128,335
Equity securities	219,734	3,469	(30,620)	192,583
Other investments – affiliate corporate loans	6,110	255		6,365
Total fair value option investments	**$ 1,477,622**	**$ 23,157**	**$ (35,295)**	**$ 1,465,484**
Available-for-sale investments:				
Equity securities	20,364	22	(4,271)	16,115
Total available-for-sale investments	**$ 20,364**	**$ 22**	**$ (4,271)**	**$ 16,115**
Other investments – cost-method partnerships	21,756	2,197	(1,904)	22,049
Total investments recorded at fair value	**$ 1,519,742**	**$ 25,376**	**$ (41,470)**	**$ 1,503,648**

(a) Includes investments of $9.6 million and $2.6 million pledged for derivative obligations at December 31, 2019 and 2018, respectively.

(b) Includes investments of $0.9 million and $21.9 million pledged for derivative obligations at December 31, 2019 and December 31, 2018, respectively.

Fixed maturity securities, including short-term investment, by contractual maturity at December 31, 2019 were as follows:

(In thousands)	Amortized Cost	Fair Value
Due in one year or less	$ 727,533	$ 729,652
Due after one year through five years	408,417	408,267
Due after five years through ten years	5,571	6,107
Due after ten years	58,454	97,845
Total	$ 1,199,975	$ 1,241,871

Expected maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

Total investments at December 31, 2019 also include other investments detailed below and derivative contracts described in Note 4.

Other investments consist of the following:

	December 31,	
(In thousands)	2019	2018
Equity-method common stock (a)	$ 132,860	$ 162,028
Equity-method partnerships (a)	12,107	13,502
Cost-method partnerships, at fair value (cost $29,649 in 2019 and $21,756 in 2018) (b)	29,873	22,049
Affiliate corporate loans (cost $15,712 in 2019 and $6,110 in 2018)	16,523	6,365
Total other investments	$ 191,363	$ 203,944

(a) Investments in common stock, partnerships and limited liability companies accounted under the equity-method are recorded at cost, adjusted for subsequent purchases, distributions, other-than-temporary impairments, if any, and the Company's share of the changes in the investee's net asset value since the initial acquisition.

(b) Partnerships and limited liability company investments where the Company's ownership is minor and the Company does not have significant operating or financial influence are recorded at fair value. Effective January 1, 2019, upon adoption of the updated guidance for financial instruments (see Note 2), changes in fair value of cost-method partnerships are recorded in the change in net unrealized gains/losses on fair value option investments in net income. Prior to the adoption of this updated accounting guidance, changes in fair value of cost-method partnerships were recorded in Other comprehensive income (loss).

At December 31, 2019, the Company had commitments to invest an additional $16.1 million in partnerships and limited liability companies.

Net realized losses on investments, excluding derivatives, were as follows:

	Year Ended December 31,		
(In thousands)	2019	2018	2017
Gains (losses) from other investments (a)	$ (7,117)	$ (697)	$ 6,848
Sales of equity securities (b)	(3,256)	(97,838)	(19,324)
Sales of fixed maturity securities, including short-term investments and other (c)	(2,451)	1,799	12,453
Net realized losses on investments	$ (12,824)	$ (96,736)	$ (23)

(a) Net losses from other investments for the year ended December 31, 2019 include a $11.6 million other-than-temporary impairment for Astarta Holdings NV, partially offset by $2.7 million gain on sale for Grivalia Properties; $0.8 million gain on dilution for Farmer's Edge, Inc. and a $0.8 million gain on cost-method partnership distributions (see Note 12).

Net gains from other investments for the year ended December 31, 2017 primarily include $2.4 million gain on sale of Agrigroupe LP to Fairfax Africa Holdings Corp.; $2.0 million gain on sale of a cost-method partnership; $1.0 million realized gain on sale of Apple Bidco and $1.1 million gain on dilution for Boat Rocker Media Inc. as a result of additional shares issued (see Note 12).

(b) Net realized losses on sales of equity securities for the year ended December 31, 2019 include realized foreign exchange losses of $2.7 million on the return of capital distribution from a privately held common stock investment and realized losses of $1.7 million on the conversion of AGT Food and Ingredients Inc. ("AGT") preferred stock to common stock as a result of AGT's privatization (see Note 12). Realized losses on equity securities for the year ended December 31, 2019 were partially offset by realized gains of $1.3 million on the sale of two fair value option common stock investments.

Net realized losses on sales of equity securities for the year ended December 31, 2018 include $1.2 million of gross realized gains and $99.0 million of gross realized losses on sales of fair value option equity securities, including $86.0 million of realized losses recognized upon transfer of certain equity securities to pay dividends to Fairfax affiliates in December 2018 (see Note 12).

Net realized losses on sales of equity securities for the year ended December 31, 2017 include $5.0 million of gross realized gains and $24.3 million of gross realized losses on sales of fair value option equity securities. These gross realized losses included $15.3 million of losses on Exco Resources, Inc. ("Exco") that were reclassified from unrealized losses when the Company commenced applying the equity method of accounting upon increase in ownership interest in Exco in 2017. This reclassification had no impact on net income or total comprehensive income (loss). Gross realized losses also included $8.8 million of realized losses recognized upon transfer of an equity security to pay dividends to Fairfax affiliates in December 2017 (see Note 12).

(c) In June 2019, Exco emerged from bankruptcy protection and settled the Company's Exco bonds with common stock shares, resulting in the Company recording a net loss on investment of $4.6 million for the year ended December 31, 2019 (realized losses of $7.8 million, of which $3.2 million was previously recorded as unrealized losses at December 31, 2018). Realized losses on fixed maturity securities for the year ended December 31, 2019 were partially offset by realized gains of $5.5 million, including $4.9 million of realized gains recognized upon transfer of certain fixed maturity securities to pay dividends to Fairfax affiliates in December 2019 (see Note 12).

Net realized gains on sales of fixed maturity securities, including short-term investments and other for the year ended December 31, 2018 include $1.9 million of gross realized gains and $0.1 million of gross realized losses on sales of fair value option fixed maturity securities.

Net realized gains on sales of fixed maturity securities, including short-term investments and other for the year ended December 31, 2017 include $13.5 million of gross realized gains and $1.0 million of gross realized losses on sales of fair value option fixed maturity securities. These gross realized gains included $4.5 million of realized gains recognized upon transfer of a fixed maturity security to pay dividends to Fairfax affiliates in June 2017 (see Note 12).

The changes in net unrealized gains/losses on investments recognized as a separate component of stockholders' equity and were as follows:

	Year Ended December 31,		
(In thousands)	2019	2018	2017
Equity-method common stock	$ (3,626)	$ (85)	$ (1,434)
Equity-method partnerships	268	1,006	396
Cost-method partnerships (a)		(942)	(276)
Available-for-sale equity securities (a)		(132)	2,192
Total before tax	$ (3,358)	$ (153)	$ 878
After tax (see Note 13)	$ (2,653)	$ (121)	$ 571

(a) Effective January 1, 2019, upon adoption of the updated guidance for financial instruments (see Note 2) changes in fair value of available-for-sale equity securities and cost-method partnerships are recorded in the change in net unrealized gains/losses on fair value option investments in net income.

The change in net unrealized gains/losses on fair value option investments still held was as follows:

	Year Ended December 31,		
(In thousands)	2019	2018	2017
Change in net unrealized gains/losses recognized on fair value option investments	$ 14,715	$ 6,666	$ 90,321
Less: Net losses recognized on fair value option investments sold	5,077	51,606	8,753
Change in net unrealized gains/losses recognized on fair value option investments still held at the reporting date	$ 9,638	$ (44,940)	$ 81,568

Net investment income was as follows:

	Year Ended December 31,		
	2019	2018	2017
Fixed maturity securities (a)	$ 30,122	$ 23,022	$ 20,790
Equity securities (b)	5,829	16,511	3,775
Short-term and other investments (a)	4,840	8,373	5,825
Derivatives	2,151	5,473	203
Income (loss) from equity-method investments (c)	(19,760)	(9,566)	6,652
Subtotal	23,182	43,813	37,245
Investment expenses	(7,639)	(7,994)	(7,151)
Net investment income	$ 15,543	$ 35,819	$ 30,094

(a) Income from fixed maturity securities in the twelve months ended December 31, 2019 increased compared to the corresponding period of 2018, primarily as a result of the reinvestment of the short-term investments into short-dated U.S. Government bonds and high quality corporate bonds in the later part of 2018 and first quarter of 2019. In 2017 and early part of 2018, a large portion of the long-dated taxable and tax-exempt municipal bonds was sold and redeemed, with the proceeds primarily reinvested in short-term and short-dated U.S. Government bonds and high quality corporate bonds in the later part of 2018.

(b) Income from equity securities in the year ended December 31, 2018 includes a $12.4 million special dividend received from a common stock investment.

(c) Income (losses) from equity-method investments for each period presented is detailed below:

	Year Ended December 31,		
(In thousands)	2019	2018	2017
Fairfax Africa Holdings Corp.	$ (8,751)	$ (1,489)	$ 3,403
Apple Bidco	(5,957)	(1,014)	623
Farmers Edge Inc.	(4,931)	(5,121)	(2,327)
Davos Brands LLC	(1,664)	(1,228)	(1,672)
Alberta ULC	(711)	350	41
AGT Food and Ingredients Inc.	(625)		
Boat Rocker Media Inc.	(180)	(233)	2,009
Toys R Us Canada	1,891		
Astarta Holdings NV	949	(1,958)	1,729
Fairfax India Holdings Corp.	221	1,330	3,519
Other	(2)	(203)	(673)
Income (losses) from equity-method investments	$ (19,760)	$ (9,566)	$ 6,652

At December 31, 2019 and 2018, investments with a fair value of $1.1 billion were on deposit with regulatory authorities in compliance with insurance company regulations. At December 31, 2019, the Company had additional qualifying securities with a fair value of $62.3 million available for deposit.

Note 4. Derivative Contracts

See Note 2 for a description of the Company's accounting policies related to derivative contracts.

The following table summarizes the notional amount, cost and fair value of derivative contracts:

(In thousands)	Notional Amount	Cost	Fair Value of Derivative Assets	Fair Value of Derivative Liabilities
December 31, 2019				
CPI-linked derivatives	$ 7,477,246	$ 39,318	$ 671	
Foreign currency options	437,500	7,519	820	
U.S. Government bond forwards	97,000			$ 659
Long equity total return swaps	52,591		3,046	121
Foreign exchange forwards	60,613			1,039
Total		$ 46,837	$ 4,537	$ 1,819
December 31, 2018				
CPI-linked derivatives	$ 7,920,604	$ 41,058	$ 2,303	
Foreign currency options	437,500	7,519	7,431	
U.S. Government bond forwards	94,000			$ 5,530
Long equity total return swaps	71,431			10,958
Foreign exchange forwards	13,146			16
Equity warrants	921		20	
Total		$ 48,577	$ 9,754	$ 16,504

The gains (losses) from settlements and changes in fair value of the derivative contracts are recorded as net gains (losses) on derivatives in the Consolidated Statements of Comprehensive Income (Loss) as follows:

(In thousands)	Year Ended December 31, 2019	2018	2017
Gains (losses) on settlements			
Equity derivatives:			
Equity total return swaps – long positions	$ (18,840)	$ 3,115	$ 3,980
Equity index put options	(640)		
Equity warrants		(1,234)	
Equity call options			1,357
CPI-linked derivative contracts	(1,740)		
U.S. Government bond forward contracts	(16,954)	7,135	(9,900)
Foreign exchange forward contracts	796	4,149	(4,919)
Total	(37,378)	13,165	(9,482)
Change in fair value			
Equity derivatives:			
Equity total return swaps – long positions	13,883	(11,118)	160
Equity warrants	(20)	697	(708)
CPI-linked derivative contracts	108	(1,142)	(3,696)
U.S. Government bond forward contracts	4,871	(3,844)	1,403
Foreign exchange forward contracts	(1,023)	661	(1,023)
Foreign currency options	(6,611)	(88)	
Total	11,208	(14,834)	(3,864)
Net gains (losses) on derivatives			
Equity derivatives:			
Equity total return swaps – long positions	(4,957)	(8,003)	4,140
Equity index put options	(640)		
Equity warrants	(20)	(537)	(708)
Equity call options			1,357
CPI-linked derivative contracts	(1,632)	(1,142)	(3,696)
U.S. Government bond forward contracts	(12,083)	3,291	(8,497)
Foreign exchange forward contracts	(227)	4,810	(5,942)
Foreign currency options	(6,611)	(88)	
Total net losses on derivatives	$ (26,170)	$ (1,669)	$ (13,346)

Equity contracts

The Company holds long equity total return swaps on individual equities or equity index for investment purposes. These contracts provide the total return on a notional amount (including dividends and capital gains or losses) that is directly correlated to changes in fair value of the underlying individual equities or equity indexes in exchange for the payment of a floating rate of interest on the notional amount. The Company classifies dividends and interest paid or received related to its long equity total return swaps on a net basis as investment income in the Consolidated Statements of Comprehensive Income.

Total return swaps require no initial net cash investment; and at inception the fair value is zero. The Company's long equity total return swaps may contain reset provisions requiring counterparties to cash-settle on a monthly or quarterly basis any fair value movements arising subsequent to the prior settlement date. Any cash amounts paid to settle unfavorable fair value changes and, conversely, any cash amounts received in settlement of favorable fair value changes, are recorded as net gains (losses) on derivatives recorded in the Consolidated Statements of Comprehensive Income (included in the Gains (losses) on settlements section in the table above). To the extent that a contractual reset date does not correspond to the balance sheet date, the Company records net gains (losses) on derivatives in the Consolidated Statements of Comprehensive Income to adjust the carrying value of the corresponding derivative asset or liability associated with each total return swap to reflect its fair value at the balance sheet date (included in the Change in fair value section in the table above). Final cash settlements on total return swaps are recognized as net gains (losses) on derivatives net of any previously recorded unrealized fair value changes since the last reset date (also included in the Gains (losses) on settlements section in the table above). At December 31, 2019 and 2018, the Company pledged securities with a fair value of $5.0 million and $13.3 million, respectively, as collateral to the counterparties to its long equity total return swaps derivative contracts.

In the years ended December 31, 2019, 2018 and 2017, the Company recognized $2.2 million, $5.5 million and $0.2 million, respectively, of net dividend and interest income earned recorded in net investment income on its total return swaps.

CPI-linked derivative contracts

The Company's derivative contracts referenced to the consumer price index in the United States and Europe ("CPI-linked derivatives") serve as an economic hedge against the potential adverse financial impact on the Company of decreasing price levels. The initial premium paid for each contract is recorded as a derivative asset and is subsequently adjusted for changes in fair value of the contract at each balance sheet date with a corresponding offset to net gains (losses) on derivatives in the Consolidated Statements of Comprehensive Income. In the event of a sale, expiration or early settlement of any of these contracts, the Company would receive a cash settlement equal to the fair value of that contract on the date of the transaction. The Company's maximum potential loss on any contract is limited to the original cost of that contract. The Company's CPI-linked derivatives have a remaining weighted average life of 2 years as of December 31, 2019. At December 31, 2019 and 2018, the Company pledged securities with a fair value of $1.6 million and $4.3 million, respectively, as contractually required independent collateral to a counterparty for the CPI-linked derivatives.

The following table summarizes the notional amounts and underlying CPI Index price (“strike price”) for the Company’s CPI-linked derivative contracts at initiation and the index value at December 31, 2019 and December 31, 2018:

	Notional Amount		Weighted Average Strike Price	
(Notional amount in thousands)	Original Currency	US Dollars	In Original Currency	Index Value
Underlying CPI Index:				
December 31, 2019				
United States	5,120,000	$ 5,120,000	233.02	256.97
European Union	2,100,000	2,357,246	97.66	105.13
		$ 7,477,246		
December 31, 2018				
United States	5,520,000	$ 5,520,000	232.81	251.23
European Union	2,100,000	2,400,604	97.66	104.10
		$ 7,920,604		

U.S. Government bond forward contracts

The Company holds forward contracts to sell long dated U. S. government bonds (“Treasury locks”) to reduce its exposure to interest rate risk. Treasury locks derive their value primarily from changes in fair value of the underlying U.S. Treasury bond between the contract inception and expiration dates, require no initial net cash investment, and at inception the fair value is zero. These contracts have a term to maturity of less than one year and may be renewed at market rates. To the extent that the expiration date does not correspond to the balance sheet date, the Company adjusts the carrying value of the corresponding derivative asset or liability associated with each Treasury lock to reflect its fair value at the balance sheet date with the corresponding net gains (losses) on derivatives recorded in the Consolidated Statements of Comprehensive Income. At December 31, 2019 and 2018, the Company pledged securities with a fair value of $4.0 million and $7.0 million, respectively, as contractually required independent and mark-to-market collateral to the counterparty for the Treasury locks.

Foreign exchange forward contracts

Foreign exchange forward contracts (“foreign exchange forwards”), primarily denominated in the euro and the Canadian dollar, are used to manage certain foreign currency exposures arising from foreign currency denominated investments. These foreign exchange forwards require no initial net cash investment and at inception the fair value is zero. These contracts have a term to maturity of less than one year and may be renewed at market rates. To the extent that the expiration date does not correspond to the balance sheet date, the Company adjusts the carrying value of the corresponding derivative asset or liability associated with each foreign exchange forward to reflect its fair value at the balance sheet date with the corresponding net gains (losses) on derivatives recorded in the Consolidated Statements of Comprehensive Income. At both December 31, 2019 and 2018, the Company had no pledged securities as collateral for any foreign exchange forwards.

Counterparty collateral and exposure

The Company endeavors to limit counterparty risk through the terms of master netting agreements negotiated with the counterparties to its derivative contracts. These agreements provide for a single net settlement of all financial instruments covered by the agreement in the event of default by the counterparty, thereby permitting obligations owed by the Company to a counterparty to be offset to the extent of the aggregate amount receivable by the Company from that counterparty (“net settlement arrangements”). Pursuant to these

agreements, the counterparties to the derivative contracts are also contractually required to deposit eligible collateral in collateral accounts (subject to certain minimum thresholds) for the benefit of the Company depending on the then current fair value of the derivative contracts. The Company had not exercised its right to sell or repledge collateral at December 31, 2019.

At December 31, 2019 and 2018, the Company pledged to its counterparties securities with a fair value of $10.6 million and $24.6 million, respectively, as independent and mark-to-market collateral for CPI-linked, U.S. Government bond forward and equity long total return swap derivative contracts and recorded these amounts as assets pledged for derivative obligations in the Company's Consolidated Balance Sheets.

At December 31, 2019, the counterparties pledged $0.3 million of cash and $3.1 million of U.S. Treasury notes, compared to $0.3 million of cash at December 31, 2018. The Company recorded the cash collateral as other assets and recognized a corresponding liability in its Consolidated Balance Sheets. The Company does not record in its Consolidated Balance Sheets securities pledged by counterparties as collateral for derivatives in a gain position.

The following table sets out the Company's exposure to credit risk related to the counterparties to its derivative contracts:

	December 31,	
(In thousands)	2019	2018
Total derivative assets (a)	$ 4,537	$ 9,734
Impact of net settlement arrangements	(779)	(9,469)
Fair value of collateral deposited for the benefit of the Company	(3,126)	(265)
Excess of collateral pledged by the Company in favor of counterparties		3,118
Net derivative counterparty exposure after net settlement and collateral arrangements	$ 632	$ 3,118

(a) Excludes warrants with a fair value of $20,000 at December 31, 2018, which are not subject to counterparty risk.

The net derivative counterparty exposure after net settlement and collateral arrangements relates principally to the timing of collateral placement.

Offsetting of Derivative Assets/Liabilities

The Company entered into master netting agreements with certain of its derivative counterparties whereby the collateral provided (held) is calculated on a net basis. In accordance with GAAP, the Company elected not to offset derivative assets and liabilities in the Consolidated Balance Sheets for the counterparties with the master netting agreement. The following table summarizes by counterparty (1) the gross and net amounts reflected as derivative assets (excluding warrants) and liabilities in the Consolidated Balance Sheets; (2) the gross amounts of the derivative instruments eligible for netting but not offset in the Consolidated Balance Sheets; and (3) financial collateral received and pledged which is contractually permitted to be offset upon an event of default, but is not allowed to be presented net under GAAP (net amount of exposure).

		Gross amounts not offset in the Consolidated Balance Sheets		
(In thousands)	Gross and net amounts reflected in the Consolidated Balance Sheets	Derivative asset (liability)	Collateral provided (held) - financial instruments (a)	Net amount of exposure
December 31, 2019				
Derivative assets:				
Citibank, N.A.	$ 3,973	$ (762)	$ (2,579)	$ 632
Deutsche Bank AG London	80		(80)	
Bank of America	484	(17)	(467)	
Total derivative assets	$ 4,537	$ (779)	$ (3,126)	$ 632
Derivative liabilities:				
Citibank, N.A.	$ (762)	$ 762		
Bank of New York Mellon (b)	(1,040)			$ (1,040)
Bank of America	(17)	17		
Total derivative liabilities	$ (1,819)	$ 779		$ (1,040)
December 31, 2018				
Derivative assets:				
Citibank, N.A.	$ 9,469	$ (9,469)		
Deutsche Bank AG London	265		$ (265)	
Total derivative assets (c)	$ 9,734	$ (9,469)	$ (265)	
Derivative liabilities:				
Citibank, N.A.	$ (14,974)	$ 9,469	$ 5,505	
Bank of New York Mellon (b)	(16)			$ (16)
Bank of America	(1,514)		1,333	(181)
Total derivative liabilities	$ (16,504)	$ 9,469	$ 6,838	$ (197)

(a) Amounts of collateral pledged to the Company by the counterparties (collateral held) and pledged by the Company to the counterparties (collateral provided) reflected above are to the extent of the net counterparty exposure before collateral.

(b) Represents foreign exchange forward contracts that are not subject to a master netting arrangement.

(c) Excludes equity warrants with a fair value of $20,000 at December 31, 2018, which are not subject to counterparty risk.

Note 5. Fair Value Measurements

Fair values for substantially all of the Company's financial instruments are measured using market or income approaches. Considerable judgment may be required in interpreting market data used to develop estimates of fair value. Accordingly, actual values realized in future market transactions may differ from the estimates presented in these consolidated financial statements. In determining fair value, the Company primarily uses prices and other relevant information generated by market transactions involving identical or comparable assets ("market approach"). The Company also considers the impact of a significant decrease in volume and level of activity for an asset or liability when compared with normal activity to identify transactions that are not orderly.

Fair value measurements are determined under a three level hierarchy that prioritizes the inputs to valuation techniques used to measure fair value, distinguishing between market participant assumptions developed based on market data obtained from sources independent of the reporting entity ("observable inputs") and the reporting entity's own assumptions about market participant assumptions developed based on the best information available in the circumstances ("unobservable inputs"). The hierarchy level assigned to each security carried at fair value is based on the Company's assessment of the transparency and reliability of the inputs used in the valuation of each instrument at the measurement date. The highest priority is given to unadjusted quoted prices in active markets for identical assets (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). Securities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. The Company recognizes transfers between levels at the end of each reporting period in which the transfer is identified. The three hierarchy levels are defined as follows:

Level 1— Inputs represent unadjusted quoted prices for identical instruments exchanged in active markets. The fair values of publicly traded equity securities, highly liquid cash management funds and short-term U.S. Government securities are based on published quotes in active markets.

Level 2— Inputs include directly or indirectly observable inputs (other than Level 1 inputs) such as quoted prices for similar financial instruments exchanged in active markets, quoted prices for identical or similar financial instruments exchanged in inactive markets and other market observable inputs. The fair value of the vast majority of the Company's investments in fixed maturity securities, along with most derivative contracts (including long equity total return swaps, foreign exchange forwards, options and U.S. Government bond forward contracts), are priced based on information provided by independent pricing service providers, while much of the remainder are based primarily on non-binding third party broker-dealer quotes that are prepared using Level 2 inputs. Where third party broker-dealer quotes are used, typically at least one quote is obtained from a broker-dealer with particular expertise in the instrument being priced. Certain common stock investments which are measured at fair value using the net asset value per share ("NAV") practical expedient have been excluded.

Level 3— Inputs include unobservable inputs used in the measurement of financial instruments. Management is required to use its own assumptions regarding unobservable inputs as there is little, if any, market activity in these instruments or related observable inputs that can be corroborated at the measurement date. Certain cost-method partnership investments which are measured at fair value using the NAV practical expedient have been excluded. Investments for which NAV is only a component of the fair value measurement continue to be included.

The following table presents the Company's investments measured at fair value on a recurring basis as of December 31, 2019 and December 31, 2018 classified by the valuation hierarchy discussed previously:

		Fair Value Measurement Using		
(In thousands)	Total	Level 1	Level 2	Level 3
December 31, 2019				
Fair value option securities:				
Fixed maturity securities:				
State and local government debt	$ 94,396		$ 94,396	
U.S. Government debt	964,673		964,673	
Corporate debt	23,141		15,299	$ 7,842
Total fixed maturity securities	1,082,210		1,074,368	7,842
Equity securities (a)	193,753	$ 143,467		17,038
Short-term investments	159,661	153,650	6,011	
Other investments - affiliate corporate loans	16,523			16,523
Other investments – cost-method partnerships (a)	29,873			
Total fair value option investments	$ 1,482,020	$ 297,117	$ 1,080,379	$ 41,403
Derivatives:				
Equity total return swaps – long positions	$ 3,046		$ 3,046	
Foreign currency options	820		820	
CPI-linked derivative contracts	671			$ 671
Total derivative assets	4,537		3,866	671
Equity total return swaps – long positions	(121)		(121)	
U.S. Government bond forward contracts	(659)		(659)	
Foreign exchange forward contracts	(1,039)		(1,039)	
Total derivative liabilities	(1,819)		(1,819)	
Net derivatives	$ 2,718		$ 2,047	$ 671
December 31, 2018				
Fair value option securities:				
Fixed maturity securities:				
State and local government debt	$ 104,970		$ 104,970	
U.S. Government debt	983,479		983,479	
Corporate debt	49,752		31,890	$ 17,862
Total fixed maturity securities	1,138,201		1,120,339	17,862
Equity securities (a)	192,583	$ 143,657		8,754
Short-term investments	128,335	123,397	4,938	
Other investments – affiliate corporate loans	6,365			6,365
Total fair value option investments	$ 1,465,484	$ 267,054	$ 1,125,277	$ 32,981
Available-for-sale investments:				
Equity securities	$ 16,115	$ 54		$ 16,061
Total available-for-sale investments	$ 16,115	$ 54		$ 16,061
Other investments – cost-method partnerships (a)	$ 22,049			
Derivatives:				
Foreign currency options	$ 7,431		$ 7,431	
CPI-linked derivative contracts	2,303			$ 2,303
Equity warrants	20		20	
Total derivative assets	9,754		7,451	2,303
Equity total return swaps – long positions	(10,958)		(10,958)	
U.S. Government bond forward contracts	(5,530)		(5,530)	
Foreign exchange forward contracts	(16)		(16)	
Total derivative liabilities	(16,504)		(16,504)	
Net derivatives	$ (6,750)		$ (9,053)	$ 2,303

(a) Certain common stock investments with a fair value of $33.2 million and $40.2 million at December 31, 2019 and 2018, respectively, and cost-method partnership investments are measured using the NAV practical expedient and have not been classified in the fair value hierarchy. The fair value amounts presented in the "Total" column are intended to permit reconciliation of the fair value hierarchy to the amounts presented in the Consolidated Balance Sheets.

The following table presents changes in the Company's Level 3 fixed maturity, equity securities, and derivatives measured at fair value on a recurring basis:

(In thousands)	Corporate Debt	Equity Securities	Derivatives	Affiliate Corporate Loans
Balance at December 31, 2017	$ 21,689	$ 28,305	$ 4,709	
Purchases	9,395		563	$ 6,110
Sales	(7,075)		(1,645)	
Realized and unrealized gains/losses included in:				
Other comprehensive loss (a)		(138)		
Change in net unrealized gains/losses on fair value option investments	(2,853)	(3,352)		255
Accretion of discounts	81			
Net realized gains on investments	1,478			
Net losses on derivatives			(1,324)	
Transfers from Level 3 to Level 2 (b)	(4,853)			
Balance at December 31, 2018	$ 17,862	$ 24,815	$ 2,303	$ 6,365
Purchases		5,727		12,302
Sales and maturities	(5,914)	(11,484)		(2,702)
Realized and unrealized gains/losses included in:				
Change in net unrealized gains/losses on fair value option investments	3,664	8,089		558
Net investments income – accretion of discounts	41			
Net realized losses on investments	(7,811)	(4,382)		
Net losses on derivatives			(1,632)	
Transfers from Level 3 (c)		(5,727)		
Balance at December 31, 2019	$ 7,842	$ 17,038	$ 671	$ 16,523

(a) Changes in unrealized gain/losses for equity securities include changes in fair value and foreign currency fluctuation.

(b) In 2018, one private placement corporate debt security purchased in 2018 was transferred from Level 3 to Level 2 due to a change in observability of a key valuation input.

(c) Transfer out of Level 3 represents AGT common stock for which equity-method accounting commenced in the third quarter of 2019 (see Note 12).

The following table provides information on the valuation techniques, significant unobservable inputs and ranges for each major category of Level 3 assets measured at fair value on a recurring basis at December 31, 2019:

(In thousands)	Balance at December 31, 2019	Valuation Techniques	Significant Unobservable Inputs
Corporate debt (a)	$ 7,842	Market approach	Credit spread of issuer
Equity securities, fair value option (b)	$ 17,038	Market approach	Credit spread of issuer Estimated NAV multiple
Derivatives (c)	$ 671	Market approach	Broker quotes
Affiliate corporate loans (d)	$ 16,523	Market approach	Credit spread of issuer

(a) The Level 3 corporate debt securities consist of two private placement debt securities with the fair value determined using a Black-Scholes Model. Prices for identical instruments are not available and significant subjectivity may be involved when fair value is determined using pricing data available for comparable instruments.

(b) The Level 3 equity securities, fair value option consist primarily of a common stock of a company based in the United Kingdom and a preferred stock. The common stock's fair value is estimated as NAV multiple because a significant portion of its NAV, excluding cash balances, is comprised of real estate holdings supported by appraisals and also includes foreign currency fluctuations. The preferred stock's fair value is determined using a Black-Scholes Model. Prices for identical instruments are not available and significant subjectivity may be involved when fair value is determined using pricing data available for comparable instruments.

(c) The Level 3 derivatives consist primarily of CPI-linked derivatives that were valued using broker-dealer quotes which management has determined use market observable inputs except for the inflation volatility input which is not market observable.

(d) The Level 3 affiliate corporate loans consist of four loans valued at amortized cost, which approximates fair value. The estimated fair value of these securities also includes foreign currency fluctuations.

Note 6. Properties and Equipment

Properties and equipment, included in other assets, consist of the following:

(In thousands)	December 31, 2019	December 31, 2018
Land	$ 15,208	$ 15,208
Buildings	42,007	40,683
Other property and equipment	83,934	82,720
Subtotal	141,149	138,611
Accumulated depreciation	(108,647)	(105,511)
Total	$ 32,502	$ 33,100

Depreciation expense for the years ended December 31, 2019, 2018, and 2017 was $3.3 million, $3.8 million and $3.4 million, respectively.

Note 7. Income Tax

The Company is included in the consolidated federal income tax return of Fairfax (US) Inc. and its eligible subsidiaries and in various state combined or consolidated income tax returns. Zenith National and Fairfax (US) Inc. are parties to a tax allocation agreement whereby, in general, federal income taxes are allocated by Fairfax (US) Inc. to Zenith National equal to the taxes that would have been payable/refunded between the Company and the Internal Revenue Service (“IRS”) if it had filed a stand-alone consolidated federal income tax return. The insurance subsidiaries pay premium taxes on direct premiums written in lieu of most state income or franchise taxes.

The Tax Cuts and Jobs Act of 2017 (“Act”) was signed into law on December 22, 2017. The Act includes a reduction of the corporate tax rate from 35% to 21%; repeal of the AMT regime and changes to loss reserve discounting for taxable years beginning after December 31, 2017.

The deferred tax assets (“DTAs”) and deferred tax liabilities (“DTLs”) as of December 31, 2017, are measured using the new enacted tax rate of 21% that is expected to apply to taxable income in the periods in which the DTAs and DTLs are expected to be settled or realized. Changes in DTAs and DTLs, including changes attributable to changes in tax rates, are recognized as part of the current year tax expense in the Consolidated Statement of Comprehensive Income. The remeasurement of deferred taxes due to the change in tax rate is recorded as a discrete item in the income tax provision for the year ended December 31, 2017.

The difference between the statutory income tax rate and the Company’s effective tax rate on income, as reflected in the Consolidated Statements of Comprehensive Income, was as follows:

(In thousands)	Year Ended December 31, 2019	2018	2017
Statutory tax rate	at 21%	at 21%	at 35%
Statutory income tax expense	$ 19,957	$ 16,918	$ 77,118
Increase (reduction) in tax:			
Tax-exempt interest and other investments	(1,165)	(2,778)	(5,749)
Foreign taxes paid	534	350	177
State taxes refunded			(434)
Non-deductible expenses and other	112	(2,044)	823
Income tax expense before valuation allowance	19,438	12,446	71,935
Valuation allowance		21,600	
Change in tax rate			30,760
Income tax expense	$ 19,438	$ 34,046	$ 102,695

Deferred tax is provided based upon temporary differences between the tax and book basis of assets and liabilities. The components of the deferred tax assets and liabilities were as follows:

	December 31,			
	2019		2018	
	Deferred Tax		Deferred Tax	
(In thousands)	Assets	Liabilities	Assets	Liabilities
Unpaid losses and loss adjustment expenses discount	$ 14,664		$ 14,250	
Limitation on deduction for unearned premiums	6,377		6,623	
Investments	37,535		37,241	
Policyholders' dividends accrued	7,950		9,080	
Compensation and benefits	5,190		4,253	
Deferred policy acquisition costs		$ 2,684		$ 2,551
Properties and equipment		151		282
Other	326		379	
Total before valuation allowance	$ 72,042	$ 2,835	$ 71,826	$ 2,833
Valuation allowance	(21,600)		(21,600)	
Net deferred tax asset	$ 47,607		$ 47,393	

GAAP requires the Company to evaluate the recoverability of its DTAs and establish a valuation allowance, if necessary, to reduce the DTA to an amount that is more likely than not to be realized (a likelihood of more than 50%). In making this evaluation, the Company is required to consider all available evidence, both positive and negative, including objectively verifiable evidence of taxable income in the immediate ensuing years. The discounting of loss reserves for tax purposes reverse over 10 to 25 years; and the limitation on deductions for unearned premiums reverse in the following year. Investments-related DTAs at December 31, 2019 are primarily attributable to deferred and unrealized tax losses on the Company's equity securities.

In assessing the recoverability of the Company's DTAs, management evaluates whether it is more likely than not that some portion or all of the deferred tax assets will not be realized by generating sufficient taxable income of the appropriate character. Management considers the reversal of deferred tax liabilities, carryback potential of an appropriate nature, and tax-planning strategies in making this assessment. The Company recorded a $21.6 million non-cash charge to establish a valuation allowance on its investment-related DTAs at December 31, 2019 and 2018. The valuation allowance does not adversely affect the Company's ability to use these tax deductions to reduce taxable income in the future.

At December 31, 2019 and 2018, there were no material unrecognized tax benefits.

The Company recognizes any interest and penalties related to uncertain tax positions in income tax expense; however, there were none during the years ended December 31, 2019, 2018 and 2017.

The IRS is examining taxable year 2018 and 2019. Taxable years 2015 through 2019 are subject to examination by state taxing authorities.

Note 8. Unpaid Losses and Loss Adjustment Expenses

See Note 2 for a description of the Company's accounting policies related to unpaid losses and loss adjustment expenses.

The Company's workers' compensation incurred and paid losses and allocated loss adjustment expenses, net of reinsurance, are presented in the following tables.

Workers' Compensation

(in thousands)

	Incurred Losses and Allocated Loss Adjustment Expenses, Net of Reinsurance Years Ended December 31,										As of December 31, 2019

2019										310,160	64,174	29,358
									Total	$ 2,960,809		

(1) Data presented for these calendar years is required supplementary information, which is unaudited.
(2) The amounts reported for the cumulative number of reported claims include direct and assumed open and closed claims by accident year at the claimant level. The amounts do not include claim counts for business assumed through pools and associations. Claims reported are counted even if they eventually close with no loss or loss adjustment payment or if they are within a policy deductible where the insured is responsible for payment of losses in the deductible layer.

Workers' Compensation

2015						74,561	166,502	214,635	236,628	247,394
2016							81,103	177,908	225,456	247,851
2017								85,204	183,532	230,039
2018									85,461	178,957
2019										81,641
									Total	$ 2,269,909

All outstanding liabilities for unpaid losses and allocated loss adjustment expenses beginning 2010, net of reinsurance	$ 690,900
All outstanding liabilities for unpaid losses and allocated loss adjustment expenses prior to 2010, net of reinsurance	191,588
Total outstanding liabilities for unpaid losses and allocated loss adjustment expenses, net of reinsurance	$ 882,488

(1) Data presented for these calendar years is required supplementary information, which is unaudited.

The reconciliation of the net incurred and paid loss development tables to the liability for unpaid losses and loss adjustment expenses is as follows:

(in thousands)		December 31, 2019
Workers' compensation	$	882,488
Other insurance operations		63,266
Liabilities for unpaid losses and allocated loss adjustment expenses, net of reinsurance		945,754
Liabilities for unpaid unallocated loss adjustment expenses		100,494
Liabilities for unpaid losses and loss adjustment expenses, net of reinsurance		1,046,248
Receivable from reinsurers for unpaid losses		39,617
Total gross liabilities for unpaid losses and loss adjustment expenses	$	1,085,865

The following table presents the average annual percentage payout of losses and loss adjustment expenses incurred by age, net of reinsurance, for an accident year as of December 31, 2019. The percentages show the average portion of the net losses and loss adjustment expenses paid in each succeeding year.

Average Annual Percentage Payout of Incurred Losses and Loss Adjustment Expenses by Age, Net of Reinsurance (unaudited)										
Years	1	2	3	4	5	6	7	8	9	10
	27.7%	31.2%	15.8%	8.2%	4.2%	2.6%	1.9%	1.1%	0.8%	0.6%

The following table represents a reconciliation of changes in the liability for unpaid losses and loss adjustment expenses:

	Year Ended December 31,					
		2019		2018		2017
Beginning of year, net of reinsurance	$	1,100,917	$	1,139,373	$	1,144,409
Incurred claims:						
Current accident year		425,553		455,714		480,306
Prior accident years		(82,135)		(85,290)		(76,348)
Total incurred claims		343,418		370,424		403,958
Payments:						
Current accident year		(137,727)		(137,616)		(140,573)
Prior accident years		(260,360)		(271,264)		(268,421)
Total payments		(398,087)		(408,880)		(408,994)
End of year, net of reinsurance		1,046,248		1,100,917		1,139,373
Receivable from reinsurers for unpaid losses		39,617		46,949		52,158
End of year, gross of reinsurance	$	1,085,865	$	1,147,866	$	1,191,531

The net favorable development of $82.1 million in 2019 was principally attributable to workers' compensation favorable loss development trends for 2016 through 2018 accident years. The net favorable development of $85.3 million in 2018 was principally attributable to workers' compensation favorable loss development trends for 2015 through 2017 accident years. The net favorable development of $76.3 million in 2017 was principally attributable to workers' compensation favorable loss development trends for 2013 through 2016 accident years.

Note 9. Long-Term Debt

At December 31, 2019 and 2018, the outstanding principal amount and fair value of the Company's Subordinated Deferrable Interest Debentures ("long-term debt") was $38.5 million. The long-term debt is due in 2028 and bears interest at the rate of 8.55% per annum.

The semi-annual interest payments on the long-term debt may be deferred by Zenith National for up to ten consecutive semi-annual periods. This debt is redeemable by Zenith National at 100% of the principal amount plus a "make-whole premium," if any, together with accrued and unpaid interest. The make-whole premium is the excess of the sum of the present value of the principal amount at maturity and the present value of the remaining scheduled payments of interest over 100% of the principal amount. The original issue costs and discount on the long-term debt of $1.7 million are being amortized over the term of the long-term debt. Interest, issue costs and discount expense were $3.3 million for each of the years ended December 31, 2019, 2018 and 2017.

Note 10. Reinsurance Ceded

2018-2020 Reinsurance ceded workers' compensation coverage

The Company maintains excess of loss and catastrophe reinsurance which provides protection up to $150 million for losses including catastrophe losses arising out of earthquakes and acts of terrorism including nuclear, biological and chemical attacks. For the Company's agriculture business, the Company retains the first $10 million and the layer from $20 million to $50 million of each loss arising from industrial accidents and the first $50 million of each loss arising out of earthquakes and acts of terrorism. For all other business classes, the Company retains the first $50 million of each loss.

2017 Reinsurance ceded workers' compensation coverage

The Company maintained excess of loss and catastrophe reinsurance which provides protection up to $150 million for losses including catastrophe losses arising out of earthquakes and acts of terrorism including nuclear, biological and chemical attacks. For the California agriculture business, the Company retained the first $10 million and the layer from $20 million to $30 million of each loss arising from industrial accidents and the first $30 million of each loss arising out of earthquakes and acts of terrorism. For all other business classes, the Company retained the first $30 million of each loss.

Reinsurance transactions reflected in the accompanying Consolidated Statements of Comprehensive Income were as follows:

	Year Ended December 31,		
(In thousands)	2019	2018	2017
Direct premiums earned	$ 739,670	$ 807,953	$ 816,985
Assumed premiums earned	7,067	7,412	6,554
Ceded premiums earned	(11,740)	(11,066)	(11,935)
Net premiums earned	$ 734,997	$ 804,299	$ 811,604
Ceded losses and loss adjustment expenses incurred	$ 2,285	$ (970)	$ 1,081

Amounts recoverable for paid and unpaid losses from reinsurers at December 31, 2019 and 2018 and their respective A.M. Best ratings were as follows:

	December 31,		A.M. Best	A.M. Best
(In thousands)	2019 (a)	2018 (a)	Rating (b)	Rating Date
General Reinsurance Corp.	$ 33,718	$ 38,535	A++	3/2019
Lloyds Underwriters		1,528	A	7/2018
Factory Mutual Insurance Company	853	1,051	A+	2/2019
All others (c)	5,585	6,771		
Total	$ 40,156	$ 47,885		

(a) Under insurance regulations in California, reinsurers placed securities on deposit equal to the California component of the Company’s ceded workers’ compensation loss reserves.

(b) A.M. Best, in assigning ratings, is primarily concerned with the ability of insurance and reinsurance companies to pay the claims of policyholders. In the A.M. Best ratings scheme, ratings of B+ to A++ are considered “Secure” and ratings of B and below are considered “Vulnerable.” NR means A.M. Best does not rate the reinsurer.

(c) No individual reinsurer in excess of $0.8 million and $1.0 million at December 31, 2019 and 2018, respectively.

Note 11. Stockholders’ Equity and Statutory Financial Information

Dividend Restrictions

The California Insurance Holding Company System Regulatory Act limits the ability of Zenith Insurance to pay dividends to Zenith National and for Zenith Insurance to receive dividends from its insurance subsidiary by providing that the appropriate insurance regulatory authorities in the state of California must approve any dividend that, together with all other such dividends paid during the preceding twelve months, exceeds the greater of: (a) 10% of the paying company’s statutory surplus as regards policyholders at the preceding December 31; or (b) 100% of the net income for the preceding year. In addition, any such dividend must be paid from policyholders’ surplus attributable to accumulated earnings. Such restrictions on dividends are not cumulative. Dividend payments from Zenith Insurance to Zenith National must also be in compliance with the California Corporations Code that permit dividends to be paid only out of retained earnings and only if specified ratios between assets and liabilities and between current assets and current liabilities exist after payment.

In 2019, Zenith National paid ordinary dividends of $55.7 million ($23.0 million in fixed maturity securities, at fair value including accrued interest, and $32.7 million in cash) to Fairfax affiliates. In 2018, Zenith National paid ordinary dividends of $81.9 million ($39.0 million in equity securities, at fair value, and $42.9 million in cash) to Fairfax affiliates. In 2017, Zenith National paid ordinary dividends of $111.0 million ($30.9 million in equity securities, at fair value; $19.5 million in fixed maturity securities, at fair value including accrued interest; and $60.6 million in cash) to Fairfax affiliates.

In 2019, Zenith Insurance paid ordinary dividends of $60.7 million ($23.0 million in fixed maturity securities, at fair value including accrued interest, and $37.7 million in cash) to Zenith National. In 2018, Zenith Insurance paid ordinary dividends of $85.9 million ($39.0 million in equity securities, at fair value, and $46.9 million in cash) to Zenith National. In 2017, Zenith Insurance paid ordinary dividends of $115.0 million ($30.9 million in equity securities, at fair value; $19.5 million in fixed maturity securities, at fair value including accrued interest; and $64.6 million in cash) to Zenith National. Zenith Insurance has the ability to pay up to $66.9 million of dividends to Zenith National without prior approval of the California Department of Insurance (“California DOI”) during 2020.

In 2019, 2018 and 2017, ZNAT Insurance Company (“ZNAT”), a wholly-owned insurance subsidiary of Zenith Insurance, paid dividends of $2.8 million, $2.5 million and $2.7 million, respectively, to Zenith Insurance to

reduce ZNAT's excess capital. ZNAT Insurance has the ability to pay up to $2.5 million to Zenith Insurance without prior approval of the California DOI during 2020.

Statutory Financial Data

The capital stock and surplus and net income of the Company's insurance subsidiaries, prepared in accordance with the statutory accounting practices of the National Association of Insurance Commissioners, were as follows:

(In thousands)	As of and for the Year Ended December 31, 2019	2018	2017
Capital stock and surplus	$ 531,836	$ 541,085	$ 571,728
Net income	$ 66,650	$ 134,018	$ 85,664

Statutory accounting net income differs from GAAP primarily due to the timing of the recognition of changes in fair value of investment securities.

The insurance business is subject to state-by-state regulation and legislation focused on solvency, pricing, market conduct, claims practices, underwriting, accounting, investment criteria, and other areas. Such regulation and legislation changes frequently. Compliance is essential and is an inherent risk and cost of the business. The Company believes it is in compliance with all material regulations.

Note 12. Related Party Transactions

Investments

Management of all of the Company's investments is centralized at Fairfax through investment management agreements entered into in 2010. The parties to these agreements are Zenith National's insurance subsidiaries, Fairfax and Hamblin Watsa Investment Counsel, Ltd. ("HWIC"), a Fairfax affiliate. Investment management expenses incurred under these agreements were $4.8 million, $5.2 million and $4.8 million for the years ended December 31, 2019, 2018 and 2017, respectively.

In December 2019, Zenith National paid a $25.0 million ordinary dividend to Fairfax affiliates in the form of a fixed maturity security and cash. The Company transferred a portion of its investment in certain tax exempt fixed maturity securities with a fair value of $23.0 million, including accrued interest, to Fairfax (US) Inc. and recognized a realized gain of $4.9 million.

In December 2018, Zenith National paid an $81.9 million ordinary dividend to Fairfax affiliates in the form of two equity securities and cash. As a result, the Company transferred its entire positions in Eurobank Ergasias S.A. ("Eurobank") and Blackberry Limited ("BBRY") common stock with a fair value of $25.0 million and $14.0 million, respectively, to Fairfax (US) Inc. and recognized realized losses of $63.0 million and $23.0 million, respectively.

In December 2017, Zenith National paid a $76.0 million ordinary dividend to Fairfax affiliates in the form of an equity security and cash. As a result, the Company transferred a portion of its investment in Kennedy Wilson Inc. ("KWI") common stock with a fair value of $30.0 million to Fairfax (US) Inc. and recognized a realized loss of $8.8 million.

In June 2017, Zenith National paid a $35.0 million ordinary dividend to affiliates of Fairfax in the form of an equity security, a fixed maturity security and cash. As a result, the Company transferred a portion of its investments in KWI common stock with a fair value of $0.9 million and BBRY bonds with a fair value of $19.5 million, including accrued interest, to Fairfax (US) Inc. and recognized a realized loss of $0.2 million and a realized gain of $4.5 million on the transfer of KWI common stock and BBRY bonds, respectively.

In September 2019, the Company sold six corporate bond securities, at fair value including accrued interest, to U.S. Fire Insurance Company, an affiliate of Fairfax, for $12.9 million in cash. The Company recognized realized gains of $0.2 million on the sale.

The Company owns common stock, fixed maturity securities and corporate loans issued by publicly-traded and private companies and invests in limited partnerships which are affiliates of Fairfax (including but not limited to investments described in the following paragraphs). Affiliated common stock investments are recorded using the equity-method of accounting, unless a fair value option is elected for such securities. The Company's share of net income/loss of the equity-method investees is recorded in net investment income in the Consolidated Statements of Comprehensive Income. Net realized gains/losses on sales and on dilution resulting from additional shares issued or bought back by equity-method investees are recorded in net realized gains (losses) on investments in the Consolidated Statements of Comprehensive Income. The Company's share of other changes in investees' equity is recorded in the net change in unrealized gain/losses on investments in Other comprehensive income (loss). Net unrealized gains/losses on foreign currency translation adjustment related to the Company's equity-method investments are recorded in the Change in unrealized foreign currency translation adjustment in Other comprehensive income (loss).

The aggregate value of the Company's affiliated investments at December 31, 2019 and December 31, 2018 was as follows:

(In thousands)	December 31 2019	December 31, 2018
Fixed maturity securities, at fair value option	$ 5,080	$ 15,314
Equity securities, at fair value option	53,484	57,617
Other invested assets:		
Equity-method common stock	132,860	162,028
Equity-method partnerships	12,107	13,502
Affiliate corporate loans	16,523	6,365

The following table summarizes the impact from the Company's affiliated investments on various components of Total comprehensive Income:

	Year Ended December 31,		
(In thousands)	2019	2018	2017
Included in Net income:			
Net investment income (loss)	$ (15,718)	$ (6,937)	$ 8,248
Net realized gains (losses) on investments	(17,247)	(1,369)	7,110
Change in net unrealized gains/losses on fair value option investments	2,099	(8,867)	1,846
Included in Other comprehensive income (loss):			
Net change in unrealized gains/losses on investments, before tax	(3,358)	921	(1,038)
Change in unrealized foreign currency translation adjustment, before tax	2,720	(2,438)	3,766

The Company owns common stock shares in various mutual fund classes of HWIC Asia, which is a wholly-owned subsidiary of Fairfax. The Company elected the fair value option of accounting for its investment in HWIC Asia common stock. At December 31, 2019 and 2018, the aggregate fair value of these investments was $33.2 million and $40.2 million, respectively. Changes in fair value for these investments are recorded in the change in net unrealized gains/losses on fair value option investments in the Consolidated Statements of Comprehensive Income. The Company recorded changes in unrealized gains/losses related to its investments in HWIC Asia of $7.0 million decrease, $8.0 million decrease and $3.2 million increase during the years ended December 31, 2019, 2018 and 2017, respectively. The Company recorded dividend income related to its investments in HWIC Asia of $1.6 million, $1.0 million, and $0.3 million for the years ended December 31, 2019, 2018, and 2017, respectively.

In February 2018, Fairfax and the Company invested in private placement non-rated debt securities issued by Seaspan Corporation ("Seaspan"), a publicly traded company domiciled in the Marshall Islands. Fairfax and the Company received warrants ("Seaspan Warrants") to purchase Seaspan common stock in connection with this investment. Seaspan became an affiliate of Fairfax and the Company simultaneously with this investment. The Company's share of this investment was $5.0 million, allocated between $4.4 million ($5.0 million par value) in Seaspan corporate bonds and $0.6 million in Seaspan Warrants. The Company sold its Seaspan Warrants, at fair value, to Wentworth in April 2018 for $0.6 million. In July 2018, the Company purchased 0.8 million shares of Seaspan Warrants from Wentworth for $2.8 million and subsequently converted these warrants to purchase an equivalent number of Seaspan common stock shares for $5.2 million in cash paid to Seaspan. The Company recorded the acquisition of Seaspan affiliated common stock at a cost of $7.6 million and recognized a loss of $0.4 million on the conversion of Seaspan Warrants. The Company elected the fair value option of accounting for its investment in Seaspan affiliated common stock. At December 31, 2019 and December 31, 2018, the carrying value of the Company's investment in Seaspan affiliated common stock was $11.3 million and $6.2 million, respectively. At December 31, 2019 and December 31, 2018, the carrying value of the Company's investment in Seaspan affiliated fixed maturity securities was $5.1 million and $4.9 million, respectively.

In February 2018, Fairfax completed the sale of its 51.0% ownership interest in the Keg Restaurants Ltd. ("Keg") to Cara Operations Limited ("Cara"), a publicly traded majority-owned subsidiary of Fairfax domiciled in Canada, for consideration comprised of cash and Cara common stock. In 2014, the Company invested in FFHL LP, a wholly-owned limited partnership subsidiary of Fairfax formed to hold the Keg common stock. As a result of the sale of Keg to Cara, the Company received a $0.6 million cash dividend distribution from FFHL LP and the Company's remaining equity interest in the FFHL LP was redeemed in full in the form of $11.7 million of Cara common stock. The Company recorded its share of the FFHL LP realized loss on the sale of Keg to Cara of $0.3 million as part of equity in losses of FFHL LP in investment income. The Company recognized a realized loss on foreign exchange of $1.2 million upon final redemption of its investment in FFHL LP that was reclassified from unrealized foreign currency translation adjustment previously recorded in equity. Cara was subsequently renamed Recipe Unlimited Corp. ("Recipe"). The Company elected the fair value option of accounting for its investment in Recipe affiliated common stock. At December 31, 2019 and 2018, the carrying value of the Company's investment in Recipe affiliated common stock was $8.9 million and $11.2 million, respectively.

At December 31, 2018, the Company owned the following investments in Exco Resources, Inc. ("Exco"), an affiliate of Fairfax and the Company: Exco equity-method common stock ("Old Exco Stock"), carried at zero value as of December 31, 2018, 1.75 and 1.5 Exco Lien Bonds ("Exco Bonds") and private debtor-in-possession loans to Exco ("Exco DIP Loans") classified as Other Investments – Affiliate Corporate Loans in the Consolidated Balance Sheets. Exco filed for bankruptcy restructuring in January 2018. In June 2019, Exco emerged from bankruptcy protection and settled the Company's investments in Exco DIP Loans and Exco bonds with $2.8 million in cash and newly issued Exco common stock ("Exco Stock") with a fair value of $5.9 million. The impact of the derecognition of the Exco Bonds on the Company's investment results in the year ended December 31, 2019 was as follows: realized loss recognized of $7.8 million, partially offset by the change in net unrealized gains/losses on investments of $3.2 million (from the reclassification of previously recognized unrealized losses), and investment income reduction of $0.3 million, primarily for the write-off of the remaining accrued interest. The derecognition of the previously owned Old Exco Stock did not have an impact on the current year investment results as this investment was valued at zero as of December 31, 2018. The Company records its investment in the affiliated Exco Stock using the equity-method of accounting. The carrying value of this affiliated Exco Stock was $6.1 million as of December 31, 2019.

At December 31, 2018, the Company owned an investment in the common stock of Grivalia Properties REIC ("Grivalia"), a majority-owned publicly traded subsidiary of Fairfax. The Company recorded this affiliated common stock investment using the equity-method of accounting. In May 2019, Grivalia merged into Eurobank, as a result of which shareholders of Grivalia, including the Company, received 20.9 million newly

issued shares of Eurobank common stock in exchange for Grivalia shares, with a fair value of $16.7 million. Accordingly, the Company derecognized its investment in Grivalia common stock and recognized a net realized gain of $2.7 million on this transaction ($5.2 million realized gain on sale, partially offset by a $2.5 million realized loss as a result of the reclassification of the cumulative translation adjustment to net income). In connection with the merger, in February 2019 Grivalia paid a pre-merger capital dividend. The Company recorded cash received of $0.6 million as a reduction of the carrying value of its investment in Grivalia common stock prior to the merger. The Company elected the fair value option of accounting for its investment in Eurobank common stock.

The Company owned an investment in the preferred stock of AGT Foods and Ingredients Inc. (“AGT”) as of December 31, 2018. In April 2019, AGT completed its previously announced management led privatization, resulting in the conversion of the outstanding preferred stock into new AGT Class A common stock (“AGT Stock”). In connection with the privatization, Fairfax, including Zenith, as a member of the buying group, extended loans to AGT (“AGT Loans”) in order to, among other things, acquire all of the outstanding AGT old common stock shares not already owned by the buying group. Upon closing, Fairfax’s total holdings of AGT Stock represented a controlling equity interest in AGT. In the second quarter of 2019, the Company recognized a realized loss of $1.7 million on the conversion of the AGT preferred stock. In connection with the AGT Loans, Fairfax, including Zenith, received warrants (“AGT Warrants”) that, if exercised, would increase its equity interest in AGT to approximately 80%. Fairfax commenced consolidation of the assets, liabilities, and results of operations of AGT in its consolidated financial reporting in the second quarter of 2019. The Company immediately sold the AGT Warrants to Wentworth Insurance Company Ltd. (“Wentworth”), an affiliate of Zenith and Fairfax, at cost. The Company classifies its investment in the AGT Loans as Affiliated Corporate Loans in Other Invested Assets. As of December 31, 2019, the carrying value of the Company’s investment in its AGT Loans and AGT Stock was $9.6 million and $4.9 million, respectively.

The Company owns an investment in the common stock of Boat Rocker Media Inc. (“Boat Rocker”), a majority-owned subsidiary of Fairfax. In March 2019, the Company sold a portion of its investment to a third party for $0.4 million and recognized a realized gain on the sale of $0.3 million. The carrying value of the Company’s investment in Boat Rocker equity-method common stock was $10.9 million and $14.9 million at December 31, 2019 and, 2018, respectively.

In March 2017, the Company invested $21.0 million in Farmers Edge, Inc. (“Farmers Edge”), a private Canadian company that became an affiliate of Fairfax and the Company simultaneously with the Company’s investment at which time the Company commenced equity-method accounting. In December 2017, the Company sold a portion of its investment in Farmers Edge to Allied World Insurance Company, a Fairfax affiliate, for $5.0 million and recognized $0.4 million of realized gain on the sale. In February 2018, Fairfax and the Company entered into a private loan agreement (“Farmers Edge Loan”) with Farmers Edge. Fairfax and the Company also received warrants (“Farmers Edge Warrants”) to purchase Farmers Edge common stock in connection with this loan. The Company’s investment in Farmers Edge was $4.1 million, allocated between $3.4 million (Canadian $5.0 million par value) in Farmers Edge Loan and $0.7 million in Farmers Edge Warrants. The Company sold the Farmers Edge Warrants at cost to Wentworth on the day of acquisition. In February 2019, the Company invested an additional Canadian $4.0 million in Farmers Edge Loans. Farmers Edge Loans are included in Other Investments – Affiliate Corporate Loans in the Consolidated Balance Sheets. At December 31, 2019 and December 31, 2018, the total carrying value of the Farmers Edge Loans was $6.9 million and $3.7 million, respectively. The Company also owns 5.3 million shares of Farmers Edge equity-method common stock, with a carrying value of $5.6 million and $9.6 million at December 31, 2019 and December 31, 2018, respectively.

In September 2018, the Company paid $4.3 million to purchase 5.6 million common stock shares of Toys “R” Us (Canada) Ltd. (“Toys R Us”), a wholly-owned subsidiary of Fairfax, from Allied World Assurance Company, Ltd. (“AWAC”), a wholly-owned subsidiary of Fairfax. The Company records this investment in affiliated common stock of Toys R Us using the equity-method of accounting, on a one quarter lag. In November 2019, the Company invested an additional $5.0 million for 4.7 million shares of common stock of

Toys R Us. The carrying value of this equity-method common stock investment was $11.1 million and $4.3 million at December 31, 2019 and 2018, respectively.

In January 2017, the Company invested $4.8 million in Astarta Holding NV ("Astarta"), a Netherlands company whose common stock is publicly traded on the Polish stock exchange. Astarta became an affiliate of Fairfax and the Company in March 2017 when Fairfax obtained significant influence as a result of additional investment. Fairfax and the Company commenced equity-method accounting for Astarta in March 2017 and recorded a realized gain of $0.6 million to step up the Company's cost basis to the fair market value of its investment on the day significant influence was obtained. In May 2017, the Company exercised a call option to acquire additional shares of Astarta for $7.5 million and recorded a realized gain of $1.4 million on the call option exercise. The fair value of this investment has been significantly below its carrying value for an extended period of time. Therefore, the Company recorded an other-than-temporary impairment realized loss of $11.6 million in the fourth quarter of 2019 due to the extent and duration of the impairment. The carrying value of Astarta was $3.4 million and $13.6 million at December 31, 2019 and 2018, respectively.

In December 2016, the Company invested $10.0 million in 99388983 Canada Inc. ("Canada Inc."), a private Canadian company that became an affiliate of Fairfax simultaneous with the Company's investment. Canada Inc. provided a debtor-in-possession ("DIP") loan to Performance Sporting Goods ("PSG"), a Canadian company in the process of bankruptcy restructuring. In February 2017, the bankruptcy restructuring was resolved and the DIP loan was repaid, partially in cash and in assets of PSG, and Canada Inc. purchased the remaining assets and liabilities of PSG. The Company's original investment was converted into Class A common stock of Canada Inc.; and this entity was renamed Peak Achievements Athletics ("PAA"). In December 2019, the Company recorded a cash distribution received of $1.3 million as a return of capital. The carrying value of PAA was $7.0 million and $8.6 million at December 31, 2019 and 2018, respectively.

The Company owned a common stock investment in APR Energy plc that was privatized through a consortium of investors, including Fairfax, during the first quarter of 2016. In connection with the terms of the privatization deal, the Company, along with other Fairfax affiliates, invested $35.0 million in the common stock shares of the newly formed entity. In February 2016, existing shares with a fair value of $7.9 million were converted into shares of the newly formed entity, Apple Bidco. Apple Bidco became an affiliate of Fairfax simultaneously with the privatization transaction. In December 2017, the Company sold a portion of Apple Bidco to AWAC for $10.0 million and recognized a realized gain of $1.0 million. The carrying value of Apple Bidco common stock was $22.4 million and $28.4 million as of December 31, 2019 and 2018, respectively.

Other

The Company continues to be a party to various reinsurance treaties with affiliates of Fairfax that were entered into in the ordinary course of business, primarily excess of loss reinsurance agreements with Odyssey Re for 2010 through 2019. At December 31, 2019 and 2018, the Company recorded net reinsurance recoverables of $0.4 million and $1.0 million, respectively, related to the reinsurance transactions with the affiliates of Fairfax.

Zenith National paid Fairfax $5.1 million, $5.4 million and $6.6 million for the years ended December 31, 2019, 2018 and 2017, respectively, for the cost of the open market purchase made by Fairfax on Zenith National's behalf of Fairfax Subordinate Voting Shares granted to certain officers under the Restricted Stock Plan.

In November 2014, the Company entered into a Master Administrative Services Agreement with various affiliates of Fairfax. Under the agreement, the affiliated parties provide and receive administration services such as accounting, underwriting, claims, reinsurance, preparation of regulatory reports, and actuarial services. The Company began providing claims processing services for Seneca Insurance Company, Inc. ("Seneca") under this agreement in March 2016 and recorded service fee income of $0.4 million, $0.4 million

and $0.5 million for the years ended December 31, 2019, 2018 and 2017, respectively, in the Consolidated Statements of Comprehensive Income (Loss) which was substantially offset by costs of dedicated staff and allocated shared services. Other liabilities at December 31, 2019 and 2018 include a loss fund of $0.6 million maintained by the Company to process future workers' compensation claim payments on behalf of Seneca.

In March 2013, the Company entered into an agreement with TIG Insurance Company ("TIG") to become their primary workers' compensation claims service provider. The Company recorded service fee income of $8.0 million, $8.8 million, and $9.1 million for the years ended December 31, 2019, 2018 and 2017, respectively, in the Consolidated Statements of Comprehensive Income (Loss) which is substantially offset by costs of dedicated staff and allocated shared services. Other liabilities at December 31, 2019 include a net liability of $1.2 million which included a net loss fund liability of $2.7 million reduced by a service fee income receivable of $1.5 million, compared to a net liability of $3.2 million which included a net loss fund liability of $4.0 million reduced by a service fee income receivable of $0.8 million at December 31, 2018.

Note 13. Other Comprehensive Income (Loss)

Other comprehensive income (loss) is comprised of changes in unrealized gains/losses on investments and foreign currency translation adjustments. The following table summarizes the components of the Company's other comprehensive income (loss):

(In thousands)	Pre-Tax	Income Tax Effect	After-Tax
Year ended December 31, 2019			
Net unrealized losses arising during the year	$ (3,287)	$ (690)	$ (2,597)
Less: reclassification adjustment for net realized gains included in net income	(71)	(15)	(56)
Net changes in unrealized gains/losses on investments	(3,358)	(705)	(2,653)
Unrealized foreign currency translation adjustment arising during the year	609	128	481
Less: reclassification adjustment for net realized foreign exchange losses included in net income	2,111	443	1,668
Change in unrealized foreign currency translation adjustment	2,720	571	2,149
Total other comprehensive loss	$ (638)	$ (134)	$ (504)
Year ended December 31, 2018			
Net unrealized gains arising during the year	$ 629	$ 131	$ 498
Less: reclassification adjustment for net realized gains included in net income	(782)	(163)	(619)
Net changes in unrealized gains/losses on investments	(153)	(32)	(121)
Change in unrealized foreign currency translation adjustment arising during the year	(3,593)	(755)	(2,838)
Less: reclassification adjustment for net realized foreign exchange losses included in net income	1,155	243	912
Change in unrealized foreign currency translation adjustment	(2,438)	(512)	(1,926)
Total other comprehensive loss	$ (2,591)	$ (544)	$ (2,047)
Year ended December 31, 2017			
Net unrealized gains arising during the year	$ 3,620	$ 1,267	$ 2,353
Less: reclassification adjustment for net realized gains included in net income	(2,742)	(960)	(1,782)
Net changes in unrealized gains/losses on investments	878	307	571
Change in unrealized foreign currency translation adjustment	3,766	1,318	2,448
Total other comprehensive income	$ 4,644	$ 1,625	$ 3,019

The following table summarizes the net unrealized gains (losses) on investments and foreign currency translation adjustment recognized in accumulated other comprehensive loss:

(In thousands)	December 31, 2019	December 31, 2018
Equity-method common stock	$ (5,145)	$ (1,519)
Equity-method partnerships	1,670	1,402
Cost-method partnerships (a)		293
Available-for-sale equity securities (a)		(4,249)
Net unrealized loss on investments, before tax	(3,475)	(4,073)
Deferred tax benefit	(730)	(855)
Net unrealized loss on investments, after tax	(2,745)	(3,218)
Net unrealized loss on foreign currency translation adjustment, before tax	(1,718)	(4,438)
Deferred tax benefit	(361)	(932)
Net unrealized loss on foreign currency translation adjustment, after tax	(1,357)	(3,506)
Total accumulated other comprehensive loss	$ (4,102)	$ (6,724)

(a) Effective January 1, 2019, upon adoption of the updated guidance for financial instruments (see Note 2) changes in fair value of equity securities previously classified as available-for-sale and of cost-method partnerships are recorded in the change in net unrealized gains/losses on fair value option investments in Net income.

Note 14. Employee Benefit and Retirement Plans

The Company offers a tax deferred savings plan created under Section 401(k) of the Internal Revenue Code for all eligible employees. In the years ended December 31, 2019, 2018 and 2017, the Company matched 58.3%, 50% and 50%, respectively, of the first 6% of compensation (subject to certain limits) that employees contributed to the plan and is not liable for any future payments under the plan. The Company contributed $4.1 million, $3.4 million and $3.4 million under the plan for the years ended December 31, 2019, 2018 and 2017, respectively.

In June 2010, an employee stock purchase plan was approved by Zenith National's Board of Directors providing for the purchase of up to 100,000 Fairfax Subordinate Voting Shares. The plan limits employee contributions to 10% of base salary or wages before tax for each payroll period. Under this stock purchase plan, the Company matches 30% of employee contributions and purchases Fairfax Subordinate Voting Shares at market value. If the Company achieves certain annual profitability conditions, it will provide an additional 20% match on the total contributions made during the year to employees who are employed on the date the additional match is made. The Company contributed $2.1 million, $2.1 million and $1.8 million in matching contributions under the plan for the years ended December 31, 2019, 2018 and 2017, respectively. The Company is not liable for any future payments under the plan.

Note 15. Commitments and Contingencies

Leases

The Company adopted the updated accounting guidance for leases as of January 1, 2019 (see Note 2). The majority of the Company's property or office leases include an option to extend or renew the lease term. The exercise of the renewal option is at the Company's discretion. The operating lease liability includes lease payments related to options to extend or renew the lease term if the Company is reasonably certain of exercising those options. The Company utilizes a risk-free interest rate for periods comparable to the term of the underlying lease to determine the present value of lease payments.

Lease expense for the twelve months ended December 31, 2019 and 2018 was $9.1 million and $8.6 million, respectively.

Additional information related to the operating leases is provided below:

	As of and for the twelve months ended December 31, 2019	
(In thousands)	Offices	Automobile
Cash payments included in the measurement of lease liabilities reported in operating cash flows	$ 6,245	$ 1,074
Weighted average discount rate	2.12%	2.17%
Weighted average remaining lease term (in years)	4.82 years	1.98 years

The following table presents the contractual maturities of the Company's lease liabilities as of December 31, 2019:

(In thousands)	Offices	Auto Fleet	Total
2020	$ 6,942	$ 864	$ 7,806
2021	5,896	531	6,427
2022	3,981	164	4,145
2023	2,602		2,602
2024	1,989		1,989
Thereafter	3,365		3,365
Total undiscounted lease payments	$ 24,775	$ 1,559	$ 26,334
Less: present value adjustment	1,224	66	1,290
Operating lease liability	$ 23,551	$ 1,493	$ 25,044

Litigation

The Company is involved in various litigation proceedings that arise in the ordinary course of business. Disputes adjudicated in the workers' compensation administrative systems may be appealed to review boards or civil courts, depending on the issues and local jurisdictions involved. From time to time, plaintiffs also sue the Company on theories falling outside of the exclusive jurisdiction and remedies of the workers' compensation claims adjudication systems. Certain of these legal proceedings seek injunctive relief or substantial monetary damages, including claims for punitive damages, which may not be covered by reinsurance agreements. Historically, the Company has not experienced any material exposure or damages from any of these legal proceedings. In addition, in the opinion of management, after consultation with legal counsel, currently outstanding litigation is either without merit or the ultimate liability, if any, is not expected to have a material adverse effect on the Company's consolidated financial condition, results of operations or cash flows.

Note 16. Stock-Based Compensation

The following table provides information regarding the Fairfax Subordinate Voting Shares under the Restricted Stock Plan:

	Number of Shares
Authorized for purchases and grants at plan inception in 2010	200,000
Purchased and restricted	(61,433)
Vested	(45,588)
Purchased and available for future grants	(11,331)
Available for future purchases at December 31, 2019	81,648

The following represents open market purchases of Fairfax Subordinate Voting Shares under the Restricted Stock Plan which also resulted in charges to the Company's Stockholders' equity:

(Dollars in thousands, except share data)	Number of Shares	Weighted Average Purchase Price Per Share	Total Purchase Price
Purchased through December 31, 2016	82,602	$ 425.98	$ 35,188
Purchased in 2017	12,908	509.28	6,574
Purchased in 2018	11,315	474.36	5,367
Purchased in 2019	11,527	443.41	5,111
Total purchased since plan inception	118,352	441.39	$ 52,240

Changes in the restricted shares outstanding were as follows:

(Dollars in thousands, except share data)	Number of Shares	Weighted Average Grant Date Fair Value Per Share	Grant Date Fair Value
Restricted Shares at December 31, 2016	41,446	$ 449.48	$ 18,629
Granted during 2017	14,335	447.71	6,418
Forfeited during 2017	(2,267)	421.59	(956)
Vested during 2017	(3,227)	384.96	(1,242)
Restricted Shares at December 31, 2017	50,287	454.37	22,849
Granted during 2018	11,608	508.90	5,907
Forfeited during 2018	(305)	474.43	(144)
Vested during 2018	(5,347)	384.87	(2,058)
Restricted Shares at December 31, 2018	56,243	472.13	26,554
Granted during 2019	12,426	473.36	5,882
Forfeited during 2019	(1,080)	469.56	(507)
Vested during 2019	(6,156)	412.44	(2,539)
Restricted Shares at December 31, 2019	61,433	478.40	$ 29,390

Stock-based compensation expense before tax was $5.9 million, $4.9 million and $4.1 million for the years ended December 31, 2019, 2018 and 2017, respectively.

Unrecognized compensation expense before tax under the Restricted Stock Plan was $13.9 million and $14.4 million at December 31, 2019 and 2018, respectively.

Supplementary Consolidating Information

Report of Independent Auditors

To the Management of Zenith National Insurance Corp.

We have audited the consolidated financial statements of Zenith National Insurance Corp. and its subsidiaries (collectively, the "Company") as of December 31, 2019 and for the year then ended and our report thereon appears on pages 2 and 3 of this document. That audit was conducted for the purpose of forming an opinion on the consolidated financial statements taken as a whole. The consolidating information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the consolidated financial statements. The consolidating information has been subjected to the auditing procedures applied in the audit of the consolidated financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the consolidated financial statements or to the consolidated financial statements themselves and other additional procedures, in accordance with auditing standards generally accepted in the United States of America. In our opinion, the consolidating information is fairly stated, in all material respects, in relation to the consolidated financial statements taken as a whole. The consolidating information is presented for purposes of additional analysis of the consolidated financial statements rather than to present the financial position, results of operations and cash flows of the individual companies and is not a required part of the consolidated financial statements. Accordingly, we do not express an opinion on the financial position, results of operations and cash flows of the individual companies.
